History in the Plural - Niklas Olsen 2012-01-30

Reinhart Koselleck (1923–2006) was one of most imposing and influential European intellectual historians in the twentieth century. Constantly probing and transgressing the boundaries of mainstream historical writing, he created numerous highly innovative approaches, absorbing influences from other academic disciplines as represented in the work of philosophers and political thinkers like Hans Georg Gadamer and Carl Schmitt and that of internationally renowned scholars such as Hayden White, Michel Foucault, and Quentin Skinner. An advocate of "grand theory," Koselleck was an inspiration to many scholars and helped move the discipline into new directions (such as conceptual history, theories of historical times and memory) and across disciplinary and national boundaries. He thus achieved a degree of international fame that was unusual for a German historian after 1945. This book not only presents the life and work of a "great thinker" and European intellectual, it also contributes to our understanding of complex theoretical and methodological issues in the cultural sciences and to our knowledge of the history of political, historical, and cultural thought in Germany from the 1950s to the present.

Queen of the Owls - Barbara Linn Probst 2020-04-07

A chance meeting with a charismatic photographer will forever change Elizabeth's life. Until she met Richard, Elizabeth's relationship with Georgia O'Keeffe and her little-known Hawaii paintings was purely academic. Now it's personal. Richard tells Elizabeth that the only way she can truly understand O'Keeffe isn't with her mind—it's by getting into O'Keeffe's skin and reenacting her famous nude photos. In the intimacy of Richard's studio, Elizabeth experiences a new, intoxicating abandon and fullness. It never occurs to her that the photographs might be made public, especially without her consent. Desperate to avoid exposure—she's a rising star in the academic world and the mother of young children—Elizabeth demands that Richard dismantle the exhibit. But he refuses. The pictures are his art. His property, not hers. As word of the photos spreads, Elizabeth unwittingly becomes a feminist heroine to her students, who

misunderstand her motives in posing. To the university, however, her actions are a public scandal. To her husband, they're a public humiliation. Yet Richard has reawakened an awareness that's haunted Elizabeth since she was a child—the truth that cerebral knowledge will never be enough. Now she must face the question: How much is she willing to risk to be truly seen and known?

The Siege - Ismail Kadare 2010-02-12

From Ismail Kadare, winner of the inaugural Man Booker International Prize – a novelist in the class of Coetzee, Pamuk, Márquez, and Rushdie – the stunning new translation of one of his major works. In the early fifteenth century, as winter falls away, the people of Albania know that their fate is sealed. They have refused to negotiate with the Ottoman Empire, and war is now inevitable. Soon enough, dust kicked up by Turkish horses is spotted from a citadel. Brightly coloured banners, hastily constructed minarets, and tens of thousands of men fill the plain below. From this moment on, the world is waiting to hear that the fortress has fallen. *The Siege* tells the enthralling story of the weeks and months that follow – of the exhilaration and despair of the battlefield, the constantly shifting strategies of war, and those whose lives are held in the balance, from the Pasha himself to the artillerymen, astrologer, blind poet, and harem of women who accompany him. "Believe me," the general said. "I've taken part in many sieges but this," he waved towards the castle walls, "is where the most fearful carnage of our times will take place. And you surely know as well as I do that great massacres always give birth to great books. You really do have an opportunity to write a thundering chronicle redolent with pitch and blood, and it will be utterly different from the graceful whines composed at the fireside by squealers who never went to war." Brilliantly vivid, as insightful as it is compelling, *The Siege* is an unforgettable account of the clash of two great civilisations, and a portrait of war that will resonate across the centuries.

The Philosophy Foundation Provocations - David Birch 2014-03-05

This book is ideal for teachers, whether they are P4C trained or just experimenting with philosophy. It will help teachers to present ideas and stimulate discussions which both accommodate and engage adolescent appetites. Are human beings flawed? Is murder an act of insanity or just plain thoughtlessness? Do we need a soul? From the fall of Icarus to the rise of Caesar this practical book draws upon history, philosophy and literature to provoke students to think, question and wonder. Divided into chapters on The World, Self, Society and Others, this resource for secondary school is written to give teachers the means to listen rather than teach and to allow the ideas and thoughts of students to form the centre of the lesson. It raises questions on the nature of evil, belief in God, slavery, consumerism, utopia, the limits of freedom, and a whole lot more. With a clear introductory outline on its use both in and out of the classroom, Provocations also contains tips and advice to help guide teachers to span the curriculum. Applicable to History, Geography, RS, Science, Art, English and Citizenship it offers teachers of all subjects the opportunity to introduce a student-centred approach to their lessons. There is also an extensive bibliography for those who wish to explore the topics in greater depth. Provocations is a set of philosophy sessions designed for secondary school and predicated on the pedagogical methods of The Philosophy Foundation. These sessions are mature, challenging and provocative, using history, literature, myth and the world today as their basis. Each session contains particular pedagogical tips and advice and suggestions as to how they can be effectively delivered

Studies in Topology - Nick M. Stavrakas 2014-05-10

Studies in Topology is a compendium of papers dealing with a broad portion of the topological spectrum,

such as in shape theory and in infinite dimensional topology. One paper discusses an approach to proper shape theory modeled on the "ANR-systems" of Mardesic-Segal, on the "mutations" of Fox, or on the "shapings" of Mardesic. Some papers discuss homotopy and cohomology groups in shape theory, the structure of superspace, on o-semimetrizable spaces, as well as connected sets that have one or more disconnection properties. One paper examines "weak" compactness, considered as either a strengthening of absolute closure or a weakening of relative compactness (subject to entire topological spaces or to subspaces of larger spaces). To construct spaces that have only weak properties, the investigator can use the various productivity theorems of Scarborough and Stone, Saks and Stephenson, Frolik, Booth, and Hechler. Another paper analyzes the relationship between "normal Moore space conjecture" and productivity of normality in Moore spaces. The compendium is suitable for mathematicians, physicists, engineers, and other professionals involved in topology, set theory, linear spaces, or cartography.

[Empire](#) - Niall Ferguson 2008-03-17

A bestselling historian shows how the British Empire created the modern world, in a book lauded as "a rattling good tale" (Wall Street Journal) and "popular history at its best" (Washington Post) The British Empire was the largest in all history: the nearest thing to global domination ever achieved. The world we know today is in large measure the product of Britain's Age of Empire. The global spread of capitalism, telecommunications, the English language, and institutions of representative government -- all these can be traced back to the extraordinary expansion of Britain's economy, population and culture from the seventeenth century until the mid-twentieth. On a vast and vividly colored canvas, Empire shows how the British Empire acted as midwife to modernity. Displaying the originality and rigor that have made Niall Ferguson one of the world's foremost historians, Empire is a dazzling tour de force -- a remarkable reappraisal of the prizes and pitfalls of global empire.

East Central Europe in the Middle Ages, 1000-1500 - Jean W. Sedlar 2013-03-01

Although the Middle Ages saw brilliant achievements in the diverse nations of East Central Europe, this period has been almost totally neglected in Western historical scholarship. East Central Europe in the

Middle Ages provides a much-needed overview of the history of the region from the time when the present nationalities established their state structures and adopted Christianity up to the Ottoman conquest. Jean Sedlar's excellent synthesis clarifies what was going on in Europe between the Elbe and the Ukraine during the Middle Ages, making available for the first time in a single volume information necessary to a fuller understanding of the early history of present-day Poland, the Czech Republic, Slovakia, Hungary, Romania, Bulgaria, Albania, and the former Yugoslavia. Sedlar writes clearly and fluently, drawing upon publications in numerous languages to craft a masterful study that is accessible and valuable to the general reader and the expert alike. The book is organized thematically; within this framework Sedlar has sought to integrate nationalities and to draw comparisons. Topics covered include early migrations, state formation, monarchies, classes (nobles, landholders, peasants, herders, serfs, and slaves), towns, religion, war, governments, laws and justice, commerce and money, foreign affairs, ethnicity and nationalism, languages and literature, and education and literacy. After the Middle Ages these nations were subsumed by the Ottoman, Habsburg, Russian, and Prussian-German empires. This loss of independence means that their history prior to foreign conquest has acquired exceptional importance in today's national consciousness, and the medieval period remains a major point of reference and a source of national pride and ethnic identity. This book is a substantial and timely contribution to our knowledge of the history of East Central Europe.

Performatism, Or the End of Postmodernism - Raoul Eshelman 2009

The author suggests that in this era following the postmodern we have entered a new, monist epoch in which aesthetically mediated belief replaces endless irony as the dominant force in culture. The book documents the "new monism" through an examination of popular films and novels such as American beauty, Life of Pi, and Middlesex as well as in the work of major architects and artists such as Sir Norman Foster, Andreas Gursky, and Vanessa Beecroft. --book cover.
