Modern Approach To Classroom Discipline

And Management: - Edwin Earl Felix

2011-01-25

There are many serious social, and economic problems that impact student s' behavior. Because countless minorities are at risk of behavior problems caused by poverty, racism, discrimination, and other negative conditions, special attention needs to be given to the development of programs and strategies to prevent behavioral problems. Developmental guidance programs in elementary schools that attend to the needs of all children are effective ways to prevent problems before they begin. Experts on poverty and inequality see a role for preschool intervention to help children from disadvantaged backgrounds have a better chance at success when they start elementary and secondary schools. Several models have been discussed such as reinforcing and rewarding behaviors, and consequences and punishment. In order to minimize disruptive behaviors, effective classroom management is the heart of preventing discipline problems. Teachers have put in place beginning the first day of school, their rules, procedures, and expectation in order to reduce problems in the classroom. A positive classroom climate is also needed to improve student learning and encourage good behavior.

Process and Experience in the Language

Classroom - Michael Legutke 2014-06-06

Process and Experience in the Language Classroom argues the case for communicative language teaching as an experiential and task driven learning process. The authors raise important questions regarding the theoretical discussion of communicative competence and current classroom practice. They propose ways in which Communicative Language Teaching should develop within an educational model of theory and practice, incorporating traditions of experimental and practical learning and illustrated from a wide range of international sources. Building on a critical review of recent language teaching principles and practice, they provide selection criteria for classroom activities based on a typology of communicative tasks

drawn from classroom experience. The authors also discuss practical attempts to utilise project tasks both as a means of realising task based language learning and of redefining the roles of teacher and learner within a jointly constructed curriculum.

Creating the Path to Success in the Classroom - Kathleen F. Gabriel 2018-05-31

This is a book for all faculty who are concerned with promoting the persistence of all students whom they teach. Most recognize that faculty play a major role in student retention and success because they typically have more direct contact with students than others on campus. However, little attention has been paid to role of

the faculty in this specific mission or to the corresponding characteristics of teaching, teacher-student interactions, and connection to student affairs activities that lead to students' long-term engagement, to their academic success, and ultimately to graduation. At a time when the numbers of underrepresented students - working adults, minority, first-generation, low-income, and international students - is increasing, this book, a companion to her earlier *Teaching Underprepared Students*, addresses that lack of specific guidance by providing faculty with additional evidence-based instructional practices geared toward reaching all the students in their classrooms, including those from groups that traditionally have been the least successful, while maintaining high standards and expectations. Recognizing that there are no easy answers, Kathleen Gabriel offers faculty ideas that can be incorporated in, or modified to align with, faculty's existing teaching methods. She covers topics such as creating a positive and inclusive course climate, fostering a community of learners, increasing engagement and students' interactions, activating connections with culturally relevant material, reinforcing self-efficacy with growth mindset and mental toughness techniques, improving lectures by building in meaningful educational activities, designing reading and writing assignments for stimulating deep learning and critical thinking, and making grade and assessment choices that can promote learning.
