Improbable Destinies -
Jonathan B. Losos 2018-08-07
A major new book overturning
our assumptions about how
evolution works Earth's natural
history is full of fascinating
instances of convergence:
phenomena like eyes and wings
and tree-climbing lizards that
have evolved independently,
multiple times. But
evolutionary biologists also
point out many examples of
contingency, cases where the
tiniest change—a random
mutation or an ancient
butterfly sneeze—caused

evolution to take a completely different course. What role does each force really play in the constantly changing natural world? Are the plants and animals that exist today, and we humans ourselves, inevitabilities or evolutionary flukes? And what does that say about life on other planets? Jonathan Losos reveals what the latest breakthroughs in evolutionary biology can tell us about one of the greatest ongoing debates in science. He takes us around the globe to meet the researchers who are solving the deepest mysteries of life on Earth through their work in experimental evolutionary science. Losos himself is one of the leaders in this exciting new field, and he illustrates how experiments with guppies, fruit flies, bacteria, foxes, and field mice, along with his own work with anole lizards on Caribbean islands, are rewinding the tape of life to reveal just how rapid and predictable evolution can be. Improbable Destinies will change the way we think and talk about evolution. Losos's

insights into natural selection and evolutionary change have far-reaching applications for protecting ecosystems, securing our food supply, and fighting off harmful viruses and bacteria. This compelling narrative offers a new understanding of ourselves and our role in the natural world and the cosmos.

Exact facsimile of the original edition, not reproduced with Optical Recognition Software. This masterwork is much more than a refutation of the economics of socialism (although on that front, nothing else compares). It is also a

critique of the entire intellectual apparatus that accompanies the socialist idea, including the implicit religious doctrines behind Western socialist thinking, a cultural critique of socialist teaching on sex and marriage, a refutation of syndicalism and corporatism, an examination of the implications of radical human inequality, an attack on war socialism, and refutation of collectivist methodology. In short, Mises set out to refute socialism, and instead pulled up the socialist mentality from its very roots. For that reason, Socialism led dozens of famous intellectuals, including a young F.A. Hayek, into a crisis of faith and a realist/libertarian political orientation. All the collectivist literature combined cannot equal the intellectual achievement of this one volume.

Art After Conceptual Art - Alexander Alberro 2006-10-27 Well-known art historians from Europe and the Americas discuss the influence of conceptualism on art since the 1970s. *Art After Conceptual Art*

tracks the various legacies of conceptualist practice over the past three decades. This collection of essays by art historians from Europe and the Americas introduces and develops the idea that conceptual art generated several different, and even contradictory, forms of art practice. Some of these contested commonplace assumptions of what art is; others served to buttress those assumptions. The bulk of the volume features newly written and highly innovative essays challenging standard interpretations of the legacy of conceptualism and discussing the influence of conceptualism's varied practices on art since the 1970s. The essays explore topics as diverse as the interrelationships between conceptualism and institutional critique, neoexpressionist painting and conceptualist paradigms, conceptual art's often-ignored complicity with design and commodity culture, the specific forms of identity politics taken up by the

reception of conceptual art, and conceptualism's North/South and East/West dynamics. A few texts that continue to be crucial for critical debates within the fields of conceptual and postconceptual art practice, history, and theory have been reprinted in order to convey the vibrant and ongoing discussion on the status of art after conceptual art. Taken together, the essays will inspire an exploration of the relationship between postconceptualist practices and the beginnings of contemporary art. Distributed for the Generali Foundation, Vienna.

Beyond Bach - Andrew Talle
2017-04-07

Reverence for J. S. Bach's music and its towering presence in our cultural memory have long affected how people hear his works. In

his own time, however, Bach stood as just another figure among a number of composers, many of them more popular with the music-loving public. Eschewing the great composer style of music history, Andrew Talle takes us on a journey that looks at how ordinary people made music in Bach's Germany. Talle focuses in particular on the culture of keyboard playing as lived in public and private. As he ranges through a wealth of documents, instruments, diaries, account ledgers, and works of art, Talle brings a fascinating cast of characters to life. These individuals--amateur and professional performers, patrons, instrument builders, and listeners--inhabited a lost world, and Talle's deft expertise teases out the diverse roles music played in their lives and in their relationships with one another. At the same time, his nuanced recreation of keyboard playing's social milieu illuminates the era's reception of Bach's immortal works.

Keepers of the Motherland -
Dagmar C. G. Lorenz
1997-01-01
Keepers of the Motherland is the first comprehensive study of German and Austrian Jewish women authors. Dagmar Lorenz begins with an examination of the Yiddish author Glikl Hamil, whose works date from the late-

seventeenth and early eighteenth centuries, and proceeds through such contemporary writers as Grete Weil, Katja Behrens, and Ruth Kl_ger. Along the way she examines an extraordinary range of distinguished authors, including Else Lasker-Sch_ler, Rosa Luxemburg, Nelly Sachs, and Gertrud Kolmar. ø Although Lorenz highlights the author?s individualities, she unifies Keepers of the Motherland with sustained attention to the ways in which they all reflect upon their identities as Jews and women. In this spirit Lorenz argues that ?the themes and characters as well as the environments evoked in the texts of Jewish women authors writing in German resist patriarchal structures. The term ?motherland,? defining the domain of the Jewish woman?s native language, regardless of political or ethnic boundaries, is juxtaposed with the concept ?fatherland,? referring to the power structures of the nation or state in which she resides.?

Lorenz describes a vital, diverse, and largely dissident literary tradition?a brilliant countertradition, in effect, that has endured in spite of oppression and genocide. Combining careful research with inspired synthesis, Lorenz provides an indispensable work for students of German, Jewish, and women?s writings.

As German as Kafka - Lene Rock 2019-12-10

Since the turn of the 21st century, countless literary endeavors by 'new Germans' have entered the spotlight of academic research. Yet 'minority writing', with its distinctive renegotiation of traditional concepts of cultural identity, is far from a recent

phenomenon in German literature. A hundred years previously, the intense involvement of German-Jewish intellectuals in cultural and political discourses on Jewish identity put a clear stamp on German modernism. This book is the first to unfold literary parallels between these two riveting periods in German cultural history. Drawing on the philosophical oeuvre of Jean-Luc Nancy, a comparative reading of texts by, amongst others, Beer-Hofmann, Kermani, Özdamar, Roth, Schnitzler, and Zaimoglu examines a variety of literary approaches to the thorny issue of cultural identity, while developing an overarching perspective on the 'politics of literature'.

Music for a Mixed Taste - Steven Zohn 2015
Georg Philipp Telemann gave us one of the richest legacies of instrumental music from the eighteenth century. Though considered a definitive contribution to the genre during his lifetime, his concertos, sonatas, and suites were then virtually ignored for nearly two centuries following

his death. Yet these works are now among the most popular in the baroque repertory. In *Music for a Mixed Taste*, Steven Zohn considers Telemann's music from stylistic, generic, and cultural perspectives. He investigates the composer's cosmopolitan "mixed taste"--a blending of the French, Italian, English, and Polish national styles-and his imaginative expansion of this concept to embrace mixtures of the old (late baroque) and new (galant) styles. Telemann had an equally remarkable penchant for generic amalgamation, exemplified by his pioneering role in developing hybrid types such as the sonata in concerto style ("Sonate auf Concertenart") and overture-suite with solo instrument ("Concert en ouverture"). Zohn examines the extramusical meanings of Telemann's "characteristic" overture-suites, which bear descriptive texts associating them with literature, medicine, politics, religion, and the natural world, and which acted as vehicles for the composer's

keen sense of musical humor. Zohn then explores Telemann's unprecedented self-publishing enterprise at Hamburg, and sheds light on the previously unrecognized borrowing by J.S. Bach from a Telemann concerto. *Music for a Mixed Taste* further reveals how Telemann's style polonaise generates musical and social meanings through the timeless oppositions of Orient-Occident, urban-rural, and serious-comic. **A Woman? Voice in Baroque Music: Mariane von Ziegler and J.S. Bach** - MarkA. Peters 2017-07-05

At the end of his second year in Leipzig, J.S. Bach composed nine sacred cantatas to texts by Leipzig poet Mariane von Ziegler (1695-1760). Despite the fact that these cantatas are Bach's only compositions to texts by a female poet, the works have been largely ignored in the Bach literature. Ziegler was Germany's first female poet laureate, and the book highlights her significance in early eighteenth-century Germany and her commitment to

advancing women's rights of self-expression. Peters enriches and enlivens the account with extracts from Ziegler's four published volumes of poetry and prose, and analyses her approach to cantata text composition by arguing that her distinctive conception of the cantata as a genre encouraged Bach's creative musical realizations. In considering Bach's settings of Ziegler's texts, Peters argues that Bach was here pursuing a number of compositional procedures not common in his other sacred cantatas, including experimentation with the order of movements within a cantata, with formal considerations in arias and recitatives, and with the use of instruments, as well as innovative approaches to Vox Christi texts and to texts dealing with speech and silence. *A Woman's Voice in Baroque Music* is the first book to deal in depth with issues of women in music in relation to Bach, and one of the few comprehensive studies of a specific repertory of Bach's

sacred cantatas. It therefore provides a significant new perspective on both Ziegler as poet and cantata librettist and Bach as cantata composer. *Leipziger Literaturzeitung* - 1823

The Moral Economy - Samuel Bowles 2016-05-28

Should the idea of economic man—the amoral and self-interested Homo economicus—determine how we expect people to respond to monetary rewards, punishments, and other incentives? Samuel Bowles answers with a resounding

“no.” Policies that follow from this paradigm, he shows, may “crowd out” ethical and generous motives and thus backfire. But incentives per se are not really the culprit. Bowles shows that crowding out occurs when the message conveyed by fines and rewards is that self-interest is expected, that the employer thinks the workforce is lazy, or that the citizen cannot otherwise be trusted to contribute to the public good. Using historical and recent case studies as well as behavioral experiments, Bowles shows how well-designed incentives can crowd in the civic motives on which good governance depends.

Extreme Economies - Richard Davies 2020-07-20

To predict our future, we must look to the extremes. So argues the economist Richard Davies, who takes readers to the margins of the modern economy and beyond. These extreme economies illustrate the forces that test human resilience, drive societies to failure, and promise to shape our collective future. Reviving

a foundational idea from the medical sciences, *Extreme Economies* turns the logic of modern economics on its head by arguing that these outlier societies can teach us more about our own than we might imagine. By adapting to circumstances unimaginable to most of us, the people in these societies are pioneering the economic infrastructure of the future.

[Economic Calculation in the Socialist Commonwealth](#) -

Ethics, Society, Politics -

Hajo Greif 2013-10-30

A real book on ethics, as Wittgenstein had it, if one could conceive it in the first place, would be the book to destroy all other books. Yet there is an increasing number of real-world discourses in which ethical values are mobilized as justifications for socio-political action while, in turn, moral problems are becoming a topic of political negotiation. Although it will be difficult to find systematic accounts of an absolute good or of absolute values in these

debates, it is equally difficult to imagine them not being deeply informed by such considerations. Rather than merely adding to the corpus of applied ethics on the one hand or remaining in seemingly Wittgensteinian silence about ethics on the other, many contributions to this volume explore the reach of what can be said in ethical terms, while others provide critical discussions of what is being

said in various fields of applied ethics and political philosophy under real-world power relations. This volume collects invited contributions from the 35th International Wittgenstein Symposium 2012 in Kirchberg am Wechsel, Austria. Authors include: Alice Crary, Peter Dabrock, Rom Harré, Agnes Heller, Jaakko Hintikka, Peter Koller, Anton Leist, Chantal Mouffe, Julian Nida-Rümelin, Hans Sluga, David Stern, Gianni Vattimo.
