Understanding Decision Support Systems and Expert Systems - Efreem Mallach 1994

Mass Media in a Mass Society - Richard Hoggart 2006-10-31

Takes a number of aspects of mass society - celebrity worship, youth culture, broadcasting and a decline in the proper use of language, and considers the paradox that the ready accessibility of information of all types does not automatically lead to greater comprehension of our world.

Digital Justice - Ethan Katsh 2017-03-09

Improving access to justice has been an ongoing process, and on-demand justice should be a natural part of our increasingly on-demand society. What can we do for example when Facebook blocks our account, we're harassed on Twitter, discover that our credit report contains errors, or receive a negative review on Airbnb? How do we effectively resolve these and other such issues? Digital Justice introduces the reader to new technological tools to resolve and prevent disputes bringing dispute resolution to cyberspace, where those who would never look to a court for assistance can find help for instance via a smartphone. The authors focus particular attention on five areas that have seen great innovation as well as large volumes of disputes: ecommerce, healthcare, social media, labor, and the courts. As conflicts escalate with the increase in innovation, the authors emphasize the need for new dispute resolution processes and new ways to avoid disputes, something that has been ignored by those seeking to improve access to justice in the past.

Differences Between the Security Models of Android and iOS - Samuel Hopstock 2019-07-24

Seminar paper from the year 2018 in the subject Computer Science - IT-Security, grade: 1,0, Technical University of Munich, course: Seminar Mobile Application Security, language: English, abstract: Smartphones are being used as the preferred device for as many things as possible in today's world. This is

why having secure phones that are resilient against attacks targeting their users' data, becomes more and more important. This paper tries to assess what measures device vendors have taken to ensure those attacks will not be successful. Because the market is mostly divided between Google's Android and Apple's iOS, we put our focus on those two operating systems and compare their respective security models. Additionally this comparison will be evaluating how those models have changed over time since the beginning of the smartphone era around 2010. The last part of this analysis will take a look at a different view on smartphones, the perspective of so-called "power users": Those are people that do not only use their smartphone for downloading some apps and surfing the Internet but rather want to do some lower-level customization to the operating system, by rooting their Android device or jailbreaking their iPhone. This process of gaining full privileges on the phone not only creates advantages for the user but can also have rather negative implications on the device's security. How exactly does this affect the protections implemented by the vendor?

Lead Like Jesus - Ken Blanchard 2006-01-08

This study guide is an individually available part of the authors' "Lead Like Jesus" kit. Only one study guide is included in the initial kit, but churches or organizations can buy as many study guides as needed for their leadership groups. There is plenty of room for writing as the concepts are explored via group and individual activities.

National Human Development Report 2014 - United Nations Publications 2015

Over the 15 years since the countrys last National Human Development Report (NHDR) was published Ethiopia has undergone significant economic and social changes and has recorded some of the highest growth rates in the world-over 10 per cent in some years. However, Ethiopias Human Development Index (HDI) and its relative ranking have not moved appreciably during the past decade. Even though Ethiopia is one of the 10 countries globally that has attained the largest absolute gains in its HDI over the last several years, it still ranks 173rd out of 186 countries in the latest UNDP Human Development Report. It is this development challenge that underlines the fact that the preparation of the NHDR is so opportune now and why the focus of the report on inclusive growth for sustainable human development is so apposite. In 1998, when the last NHDR was written, the development challenges facing the country were considerably different.

Violence Reduction in Schools-- how to Make a Difference - Chris Gittins 2006-01-01

Most schools are safe places for children but that does not mean that members of a school community live and learn together in harmony at all time. Violence towards children can take place in a variety of forms, including physical and verbal abuse and bullying. This is a practical handbook for schools to use when training staff in techniques for reducing violence. In particular, it addresses two issues: how to establish

and maintain a learning environment where violence is not tolerated and how to respond to violence when it occurs so that this environment is protected. Each chapter covers a critical area for school policy, describes the issues, and proposes activities designed to be combined into a training programme to meet the specific needs of a group of staff. This includes teachers and the growing number of support staff in European schools. School leaders, administrators and educationalists should find this guide a useful addition to the resources for reducing violence in schools available in their own country.

Concurrency Control and Recovery in Database Systems - Philip A. Bernstein 1987

Linking Practice and Theory - Fred A.J. Korthagen 2001-01-01

Although the idea of the reflective practitioner is embraced by many, there is still a need to understand how teachers' practical experience and the theoretical insights of researchers can be linked in teacher education. This book offers a framework for addressing this problem. It brings together 15 years of experience in teacher education and research, based on Korthagen's concept of "realistic teacher education" which is well known in Europe and gaining interest in North America. Set up as a journey back and forth between practice and theory, this book is not only about linking them but models how it can be done, providing both practical solutions and research-based theoretical foundations. Linking Practice and Theory: The Pedagogy of Realistic Teacher Education: * serves as a guidebook for teacher educators, with many practical ideas and guidelines; * prepares the reader for a fundamental shift in thinking about teacher education; and * uses an international perspective in analyzing real, practical experience in teacher education, in the Netherlands and in other countries.

Linux Network Servers - Craig Hunt 2006-10-11

LTE for UMTS - Harri Holma 2011-04-25

Written by experts actively involved in the 3GPP standards and product development, LTE for UMTS, Second Edition gives a complete and up-to-date overview of Long Term Evolution (LTE) in a systematic and clear manner. Building upon on the success of the first edition, LTE for UMTS, Second Edition has been revised to now contain improved coverage of the Release 8 LTE details, including field performance results, transport network, self optimized networks and also covering the enhancements done in 3GPP Release 9. This new edition also provides an outlook to Release 10, including the overview of Release 10 LTE-Advanced technology components which enable reaching data rates beyond 1 Gbps. Key updates for the

second edition of LTE for UMTS are focused on the new topics from Release 9 & 10, and include: LTE-Advanced; Self optimized networks (SON); Transport network dimensioning; Measurement results.

Public Utilities - David E. McNabb 2005-01-01

Professor McNabb has produced an excellent overview of the management challenges facing public utilities in the 21st century. His description of the evolution, changes, and challenges of different types of utilities is insightful. What makes this book uniquely valuable is his addressing the variety of utility management responsibilities including human resources, information services, and strategic planning in a single volume. I recommend it highly. Jeffrey Showman, Washington Utilities and Transportation Commission, US An introduction to the current issues and challenges facing managers and administrators in the investor and publicly owned utility industry, this engaging volume addresses management concerns in three sectors of the utility industry: electric power, natural gas, and water and wastewater systems. Beginning with a brief overview of the historical development of the industry, the author looks at policy issues and discusses management ethics. He then examines a number of the major challenges in these organizational functions: management and leadership, planning, marketing, accounting and finance, information technology, governance, and human resources. In the final section of the volume he looks at issues specific to each of the three industry sectors. Accessible and comprehensive, this thoughtful exploration of the various issues facing managers in public utilities in the new century will prove a useful overview for students of business and economics, utility staff, and directors of local utility governing boards.

The 21st Century Public Manager - Zeger van der Wal 2017-09-15

Truly global in scope and ambition, the 21st Century Public Manager addresses key trends, challenges, and opportunities facing public managers across contexts and regimes. This accessible textbook aims to inspire public managers in rethinking their roles, skills, and values as they enter a VUCA world-one characterized by volatility, uncertainty, complexity, and ambiguity. It is written for aspiring and current public managers in graduate schools and executive education programs.

Introduction to Cryptography - Hans Delfs 2012-12-06

This book covers key concepts of cryptography, from encryption and digital signatures to cryptographic protocols, presenting techniques and protocols for key exchange, user ID, electronic elections and digital cash. Advanced topics include bit security of one-way functions and computationally perfect pseudorandom bit generators. Assuming no special background in mathematics, it includes chapter-ending exercises and the necessary algebra, number theory and probability theory in the appendix. This edition offers new material including a complete description of the AES, a section on cryptographic hash functions, new material on random oracle proofs, and a new section on public-key encryption schemes that are provably secure against adaptively-chosen-ciphertext attacks.

Revealing striking differences, this collection examines traditional member states, new member states as well as non-member states.

Information Society Development Through ICT Market Strategies - Ermelinda Kordha Tolica 2015

This book examines the relationship between information society and information communication technology (ICT) markets, while evaluating the ICT impact on Albanian society and its economy. It offers insights on the country's information society development and compares it to other nations. The book begins with a general introduction to information society and efforts that can be used for ICT strategy. It then takes a look at ICT as an industrial sector and uncovers the importance for a strong ICT infrastructure management. Using this background information, the book finally explores the growing information society and ICT sector found in Albania. It measures the information society being created, and compares it to other countries in South Eastern Europe. Next the authors introduce a theoretical model for ICT driven development, focusing on ICT innovation and investment as factors that can affect the ICT market. These factors have also taken into account for strategy development in the national and industry level.

I'm the Boss of Me - Jeanne Beliveau Dunn 2016-07-01

If you're like most people, you've had good bosses and bad bosses. Some bosses have inspired you. Others have caused you to scratch your head and think, How did this person get to be in charge? But you might not realize that you have one amazing boss, someone who's capable of incredible accomplishment and legendary leadership, probably the best boss you'll ever have YOU! Yes, you. There will always be bosses, teachers, parents, and others to whom you are accountable. All those people will influence and guide you. But only you can choose your ultimate course and I'm the Boss of Me will show you how. Jeanne Beliveau-Dunn left childhood behind when she became fatherless at age 12. From this financially unstable starting point, which she calls contrast, Jeanne developed a philosophy of life based on love and meeting life's challenges with resilience and a deep willingness to learn. Now with more than 20 years of executive-level experience in the technology industry and having founded the Internet of Things Talent Consortium, Jeanne shares career-building lessons, strategies, and tactics, interspersed with stories about how she and others have used contrast, courage, resilience, and persistence to propel themselves forward into stellar careers in music, sports, real estate, technology, and many other fields. With a passion for mentoring others, Jeanne offers this guide to developing a self-empowered approach to work, career, and life. The book delivers easy-to-follow instruction on how to Build a Vision-Strategy-Execution plan Develop a personal brand statement Use networking to develop a bench of supporters who will help you bring your career dreams to reality "

IEA International Computer and Information Literacy Study 2018 Assessment Framework - Julian Fraillon 2019-07-02

This open access book presents the assessment framework for IEA's International Computer and Information Literacy Study (ICILS) 2018, which is designed to assess how well students are prepared for study, work and life in a digital world. The study measures international differences in students' computer and information literacy (CIL): their ability to use computers to investigate, create, participate and communicate at home, at school, in the workplace and in the community. Participating countries also have an option for their students to complete an assessment of computational thinking (CT). The ICILS assessment framework articulates the basic structure of the study, providing a description of the field and the constructs to be measured. This book outlines the design and content of the measurement instruments, sets down the rationale for those designs, and describes how measures generated by those instruments relate to the constructs. Hypothesized relations between constructs provide the foundation for some of the analyses that follow. Above all, the framework links ICILS to other similar research, enabling the contents of this assessment framework to combine theory and practice in an explication of both the 'what' and the 'how' of ICILS.

The Multilingual Lexicon - Jasone Cenoz 2007-05-28

This book is unique because it explores the multilingual lexicon by providing insights from research studies conducted in psycholinguistics, applied linguistics and neurolinguistics. It goes beyond the use of two languages and thus concentrates on a new and developing area in linguistic research. The different perspectives provide a link to the mainstream work on the lexicon and vocabulary acquisition and will

stimulate further debate in these areas and in the study of multilingualism.

Making it tangible. Learning outcomes in science education - Sascha Bernholt 2012

One of the central features in current educational reforms is a focus on learning outcomes. Many countries have established or revised standards to describe what teachers are supposed to teach and students are expected to learn. More recently, the emphasis has shifted to considerations of how standards can be operationalized in order to make the outcomes of educational efforts more tangible. This book is the result of a symposium held in Kiel, that was arranged by two science education groups, one at the IPN (Leibniz-Institute for Science and Mathematics Education at the University of Kiel) in Germany and the other at the University of York, UK. The seminar brought together renowned experts from 12 countries with different notions of the nature and quality of learning outcomes. The aim was to clarify central conceptions and approaches for a better understanding among the international science education community. The book is divided into five parts. In Part A, the organizers set the scene, describing the rationale for arranging the symposium. Part B provides a broad overview about different approaches, challenges, and pitfalls on the road to the clarification of meaningful and fruitful learning outcomes. The set of papers in Part C provides deep insights into different, although comparable approaches which aim to frame, to assess, and to promote learning and learning outcomes in science education. Smaller projects are presented as well as broad, coordinated national programs. The papers in Part D outline the individual historical development from different national perspectives, reflecting the deficits and problems that led to current reforms. Finally, a summary of the organizers analyses the conclusions from different vantage points.

Investigating Internet Crimes - Todd G. Shipley 2013-11-12

Written by experts on the frontlines, Investigating Internet Crimes provides seasoned and new investigators with the background and tools they need to investigate crime occurring in the online world. This invaluable guide provides step-by-step instructions for investigating Internet crimes, including locating, interpreting, understanding, collecting, and documenting online electronic evidence to benefit investigations.

Cybercrime is the fastest growing area of crime as more criminals seek to exploit the speed, convenience and anonymity that the Internet provides to commit a diverse range of criminal activities. Today's online crime includes attacks against computer data and systems, identity theft, distribution of child pornography, penetration of online financial services, using social networks to commit crimes, and the deployment of viruses, botnets, and email scams such as phishing. Symantec's 2012 Norton Cybercrime Report stated that the world spent an estimated \$110 billion to combat cybercrime, an average of nearly \$200 per victim. Law enforcement agencies and corporate security officers around the world with the responsibility for enforcing, investigating and prosecuting cybercrime are overwhelmed, not only by the sheer number of crimes being committed but by a lack of adequate training material. This book provides that fundamental knowledge, including how to properly collect and document online evidence, trace IP addresses, and work undercover. Provides step-by-step instructions on how to investigate crimes online Covers how new software tools can assist in online investigations Discusses how to track down, interpret, and understand online electronic evidence to benefit investigations Details guidelines for collecting and documenting online evidence that can be presented in court

Introduction to Indo-European Linguistics - Oswald Szemerényi 1999

Understanding E-Governance for Development - Richard Heeks 2020

New information and communication technologies can make a significant contribution to the achievement of good governance goals. This 'e-governance' can make governance more efficient and more effective, and bring other benefits too. This paper outlines the three main contributions of e-governance: improving government processes (e-administration); connecting citizens (e-citizens and e-services); and building external interactions (e-society). Case studies are used to show that e-governance is a current, not just future, reality for developing countries. However, most e-governance initiatives fail. Countries therefore face two challenges. First, the strategic challenge of e-readiness: preparing six identified pre-conditions for e-governance. Second, the tactical challenge of closing design -- reality gaps: adopting best practice in e-governance projects in order to avoid failure and to achieve success. A vision for change is therefore outlined of which more details are given in a related paper.

Stephen Colbert's Midnight Confessions - Stephen Colbert 2017-09-05

Forgive him, Father, for Stephen Colbert has sinned. He knew it was wrong at the time. But he went ahead and did it anyway. Now he's begging for forgiveness. Based on his popular segment from The Late Show, Stephen Colbert and his team of writers now reveal his most shameful secrets to millions (although,

actually, he'd like you not to tell anyone). *Midnight Confessions* is an illustrated collection of Stephen Colbert at his most brilliant and irreverent.

On War - Carl von Clausewitz 2008-09-02

The most authoritative and feature-rich edition of *On War* in English Carl von Clausewitz's *On War* is the most significant attempt in Western history to understand war, both in its internal dynamics and as an instrument of policy. Since the work's first appearance in 1832, it has been read throughout the world, and has stimulated generations of soldiers, political leaders, and intellectuals. First published in 1976 and revised in 1984, Michael Howard and Peter Paret's Princeton edition of Clausewitz's classic work has itself achieved classic status and is widely regarded as the best translation and standard edition of *On War* in English. This feature-rich edition includes an essay by Paret on the genesis of Clausewitz's book, an essay by Howard on Clausewitz's influence, and an essay by Bernard Brodie on the continuing relevance of *On War*. In addition, Brodie provides a lengthy and detailed commentary on and guide to reading *On War*, and the edition also includes a comprehensive index.
