Crane Safety on Construction Sites - Task Committee on Crane Safety on Construction Sites 1998-01-01

Crane Safety on Construction Sites (ASCE Manuals and Reports on Engineering Practice No. 93) was written to aid the construction industry in the management of crane operations. Crane operations in construction range from unloading and setting equipment on a one-time basis to using numerous cranes that perform multiple tasks on larger complex projects. This manual addresses these variables by clearly defining and assigning crane management responsibilities. It discusses issues such as safety plans, responsibilities, supervision and management, operations, training, manufacture, crane safety devices, and regulations in some detail as they relate to crane management. Appendixes are provided that list additional resources, manufacturers of crane safety devices, and explore case studies of crane accidents.

Shapo on the Law of Products Liability - Marshall S. Shapo 2012-10-22

A proliferation of lawsuits involving sport utility vehicles, defective tires, medical devices and drugs, and asbestos abounds. Public attention to products liability cases is at an all-time high, and awards routinely run into the millions of dollars. When developing a strategy in this high

stakes world, attorneys can't afford to have anything other than the best information and insight into this evolving area of law. Lawyers need practical tools to assess a products liability case's potential and build their approach, and Shapo on the Law of Products Liability provides the tools to give you the winning edge. Through a holistic analysis of the law and its principal developments as witnessed in hundreds of cases, this treatise gives litigators a wide variety of perspectives on potential strategies, and the tools to support those strategies with persuasive arguments. This authoritative two-volume work will enable you to: Assess products liability case potential and build sound litigation strategies Dig deep into products liability law to build creative approaches to litigation Craft a winning case and reap the greatest reward for your clients Find the tools and information to support strategies with persuasive arguments Both federal and state courts contribute a rich mix of decisions to products liability law, which covers both consumer products and occupational hazards. This indispensable resource for the products liability practitioner helps you prepare your case. Is the product defective? Who is liable? What is the manufacturer's responsibility? Who can be sued? What kind of awards may be realized? How might this be defended? Shapo on the Law of Products Liability also includes coverage of: Asbestos litigation Chinese drywall Food and drug Medical devices Design/manufacturing defects claims Punitive damages Discovery rule Up to date analysis and commentary History and background on

products liability law Damages Advertising material Packaging Marshall S. Shapo, the Frederic P. Vose Professor at Northwestern University School of Law, is a nationally recognized authority on torts and products liability law.

Cranes and Derricks, Fourth Edition - Lawrence Shapiro 2010-10-04

The Definitive Handbook on Cranes and Derricks--Updated Per the Latest Standards and Equipment Fully revised throughout, Cranes and Derricks. Fourth Edition, offers comprehensive coverage of the selection, installation, and safe use of cranes and derricks on construction sites. Written for both engineers and non-engineers by the principals of an engineering consulting firm that has helped to define the state-of-the-art in crane and derrick engineering, this authoritative guide discusses a wide range of equipment and the operations, capabilities, advantages, and disadvantages of each device. References to U.S. and international codes and standards are included in this practical resource, as well as a comprehensive glossary. Cranes and Derricks, Fourth Edition, covers: Lifting equipment theory and fundamentals Crane and derrick types and configurations Mobile crane practices for both crawler and wheel-based cranes Multiple crane picks Installation design for tower cranes Jumping of tower cranes Chicago boom, guy, gin pole, stiffleg, and other forms of derricks Loads acting on cranes and the forces imposed by cranes on their supports Analysis of wind using ASCE-37 and ASCE-7 Stability against overturning Safety and risk management

Occupational Safety & Health Cases - Bureau of National Affairs (Arlington, Va.) 2000

Wine to Water - Doc Hendley 2012-12-31

The captivating story of an ordinary bartender turned humanitarian who's changing the world through clean water. Doc Hendley never set out to be a hero. A small-town bartender, Doc loved his Harley, music, and booze. Then he learned about the world's water crisis, and decided to help by hosting fundraisers. But he wanted to do more and soon found himself traveling to one of the world's most dangerous hot spots: Darfur, Sudan. Doc was immediately cast into a crisis zone. The Sudanese government was wiping out entire villages through horrific state-sponsored genocide—and one of the chief weapons was water. By dumping corpses in water sources and shooting up water bladders,

Janjaweed terrorists doomed hundreds of thousands of citizens to dehydration, disease, and death. At just twenty-five years old, Doc was inexperienced, untrained, and in constant danger—but he stepped up to save lives. Alternatively begging international organizations for funding and dodging trigger-happy Janjaweed, Doc began drilling and repairing wells, bringing drinking water to those who desperately needed it. *Wine to Water* is his story about braving tribal warfare in far-flung regions of the world, and an inspirational tale of how one ordinary person can make a difference.

[Educating Students in Poverty](#) - Mark Lineburg 2013-10-02

Tackling a growing challenge in today's schools, experienced educators Lineburg and Gearheart present an honest picture of how poverty affects students, families, and the school community at large. They offer a host of practical applications that can be used in every school district in America to meet those challenges head-on! Written for preK-12 teachers,

leaders, and staff, *Educating Students in Poverty* provides essential strategies to help socioeconomically disadvantaged students achieve academic and lifelong success. Backed up with firsthand experiences and relevant research, these proactive instructional and administrative approaches cover a variety of topics, including: Advocating for underprivileged students Improving school climate and culture Engaging and communicating with families Instructional techniques and discipline issues Student health and safety This book is a must-have resource for any educator whose goal is to maximize the learning potential of every student.

Construction Equipment Ownership and Operating Expense Schedule - 1993

Government Auditing Standards - Government Accounting Office 2012 Newly revised in 2011. Contains the auditing standards promulgated by the Comptroller General of the United States. Known as the Yellow Book. Includes the professional standards and guidance, commonly referred to as generally accepted government auditing standards (GAGAS), which provide a framework for conducting high quality government audits and attestation engagements with competence, integrity, objectivity, and independence. These standards are for use by auditors of government entities and entities that receive government awards and audit organizations performing GAGAS audits and attestation engagements.

Design Loads on Structures During Construction - 2015-02

Prepared by the Design Loads on Structures during Construction Standards Committee of the Codes and Standards Activities Division of the Structural Engineering Institute of ASCE Design loads during construction must account for the often short duration of loading and for the variability of temporary loads. Many elements of the completed structure that provide strength, stiffness, stability, or continuity may not be present during construction. *Design Loads on Structures during Construction*, ASCE/SEI 37-14, describes the minimum design requirements for construction loads, load combinations, and load factors affecting buildings and other structures that are under construction. It

addresses partially completed structures as well as temporary support and access structures used during construction. The loads specified are suitable for use either with strength design criteria, such as ultimate strength design (USD) and load and resistance factor design (LRFD), or with allowable stress design (ASD) criteria. The loads are applicable to all conventional construction methods. Topics include: load factors and load combinations; dead and live loads; construction loads; lateral earth pressure; and environmental loads. Of particular note, the environmental load provisions have been aligned with those of Minimum Design Loads for Buildings and Other Structures, ASCE/SEI 7-10. Because ASCE/SEI 7-10 does not address loads during construction, the environmental loads in this standard were adjusted for the duration of the construction period. This new edition of Standard 37 prescribes loads based on probabilistic analysis, observation of construction practices, and expert opinions. Embracing comments, recommendations, and experiences that have evolved since the original 2002 edition, this standard serves structural engineers, construction engineers, design professionals, code officials, and building owners.

The Law of Products Liability - Marshall S. Shapo 2001

Accident Prevention Manual for Business & Industry - Philip E. Hagan 2001

New edition of a standard reference revised every four to six years since 1946 (the previous edition was 1997). Intended for both novices and seasoned safety professionals, as well as managers, educators, and professionals in the fields of risk management, loss control, human resources, and engineering, who must formulate safety program goals and objectives. After introductory material, coverage is in sections on loss control information and analysis; safety/ health/ environment program organization, and program implementation and maintenance. The appendices provide sources of help, a bibliography, and answers to review questions. Annotation copyrighted by Book News, Inc., Portland, OR

Atlas at War! - Michael J. Vassallo 2020-08-01

Atlas at War! collects fifty hard-hitting stories from Atlas Comics, the company that became Marvel Comics and published more war titles than anyone in the industry between the years 1951 and 1960. Comics historian Dr. Michael J. Vassallo has chosen the best of the best, many of which are coming back into print for the first time, from sixteen different Atlas war titles and featuring the artwork of twenty different artists—giants of the genre, including Russ Heath, John Severin, Bernie Krigstein, Joe Maneely, Jerry Robinson, Steve Ditko, and Jack Kirby. Each page has been meticulously restored from its first printing by comic art restorer Allan Harvey. Atlas at War! covers the brutal pre-code period where graphic depictions of war action were rendered by artists who were World War II veterans themselves, as well as the post-code period, where code restrictions forced creators to tell stories without graphic violence but produced some of the most beautiful comic art of the genre. In addition to the artists, stories cover all aspects of war—from famous

campaigns, weaponry, and personal soldier stories to political topics, Nazi atrocities, and even one story tinged with pre-code horror! Often overlooked in favor of its competitors, Atlas at War! will finally show that Atlas' war titles were second to no one.

Construction Leadership from A to Z - Wally Adamchik 2011-11-01

Tools of the trade: twenty-six tools for effective leadershipRapidly changing demographics in the construction industry and an unpredictable economy are just two challenges that require you to lead at a higher level than ever before. This book will prepare you to meet these challenges head-on.The result of exhaustive research and in-depth interviews with construction professionals across North America, Construction Leadership provides the information, tools, and confidence to deliver the leadership required for success in today's construction industry. From ensuring quality work and learning how to have a better attitude to fostering loyalty and leading across generations, Construction Leadership shows you how to be more effective and enjoy more success.With an easy-to-use format, this book provides practical information that you can put into action immediately. Each chapter

stands alone to save you time and is supported by online video, increasing your return on investment. Not reading this book puts you at a competitive disadvantage-but reading it puts you well ahead of the game.

A House to Remember - Edna Gammon 2011-10-10

What happened at 10 Rillington Place was so shocking and gruesome that even today everyone over a certain age still remembers the case with a shudder. In 1950, Timothy Evans was hanged for the violent murder of his baby daughter; he was also assumed to have murdered his wife. Then, less than three years later, another tenant, John Christie, was found to have killed at least six women, hiding their bodies in the garden, under floorboards and in a concealed kitchen alcove. Christie followed Evans to the gallows. It seemed unlikely that two murderers were living at 10 Rillington Place, and the evidence that emerged in the Christie case eventually led to Evans receiving a pardon. But there was also circumstantial evidence that Evans had indeed killed his wife and child. Crime student Edna Gammon firmly believes that Evans was guilty. In *A House To Remember*, she explains why.
