Do You Want to Learn How to DAY TRADE? If YES, then keep reading... Starting today trade is not a simple decision to take! It is possible to succeed and earn a decent living through day trading for a few hours a day. However, it may also take months before a person starts making money out of the trade. The initial year can be challenging because of the various ups and downs you will face and the main goal at this time is not to lose everything. If this does not deter you and you are still determined to start

day trading, you must plan for the following: Day Trading is something that requires seriousness and considerations. It needs for one to have a rehearsed and sound method that gives you an edge over every trade you make. Begin by watching free live chats on moving assets and ask yourself the following questions: How would one engage in a trade? How would a person get out of a winning and losing trade? How much would you be willing to risk on a trade and what position would you take or volume would you take? After deciding on the trades to use, what is the probability that a trade will be profitable and what strategies are available? To be able to answer these questions, you will need to implement the same method severally and monitor the outcome. One can create a strategy by simply finding tendencies in price action in a day for the asset or you can learn a strategy from a different person. Practicing frequently is key to day trading. Just like a sport, you practice in order to be the best, so it is in day trading. You must always practice what you need to do before you actually implement it. Remember you must fund your account which takes your hard-earned money. Your money is at stake so practice is important to avoid possible losses. By use of a demo account, practice methodically, honing your strategy over and again. What you are likely to realize is that each trade is different from the next. A particular trade today may be dormant but tomorrow it becomes extremely volatile. Today it can be ranging while tomorrow it becomes the trending stock. Without practice, you are likely to miss noticing trade signals or find yourself making trades that are not in your strategy. Practice on the strategy you are working on only, perfect it and understand it in and out. With the pressure of trading with real capital, when you move to trading live, you do not want to be second guessing yourself if you take a trade or not. Using the demo account, practice until you start being profitable for several months. Once you attain this level, you can now take the risk to open a live account that uses real capital. This book gives a comprehensive guide on the following: What is DAY TRADING? DAY TRADING pros and cons Right Mental Mindset to Have The Gold Nuggets Fibonacci Strategies First Hour Trading Technical indicators Technical Analysis Support

How to Day Trade for a Living - Dr Andrew Aziz
2016-07-28

Very few careers can offer you the freedom, flexibility and income that day trading does. As a day trader, you can live and work anywhere in the world. You can decide when to work and when not to work. You only answer to yourself. That is the life of the successful day trader. Many people aspire to it, but very few succeed. Day trading is not gambling or an online poker game. To be successful at day trading you need the right tools and you need to be motivated, to work hard, and to persevere. At the beginning of my trading career, a pharmaceutical company announced some positive results for one of its drugs and its stock jumped from \$1 to over \$55 in just two days. Two days! I was a beginner at the time. I was the amateur. I purchased 1,000 shares at \$4 and sold them at over \$10. On my very first beginner trade, I made \$6,000 in a matter of minutes. It was pure luck. I honestly had no idea what I was doing. Within a few weeks I had lost that entire \$6,000 by making mistakes in other trades. I was lucky. My first stupid trade was my lucky one. Other people are not so lucky. For many, their first mistake is their last trade because in just a few minutes, in one simple trade, they lose all of the money they had worked so hard for. With their account at zero, they walk away from day trading. As a new day trader you should never lose sight of the fact that you are competing with professional traders on Wall Street and other experienced traders around the world who are very serious, highly equipped with advanced education and tools, and most importantly, committed to making money. Day trading is not gambling. It is not a hobby. You must approach day trading very, very seriously. As such, I wake up early, go for a run, take a shower, get dressed, eat breakfast, and fire up my trading station before the markets open in New York. I am awake. I am alert. I am motivated when I sit down and start working on

the list of stocks I will watch that day. This morning routine has tremendously helped my mental preparation for coming into the market. Whatever your routine is, starting the morning in a similar fashion will pay invaluable dividends. Rolling out of bed and throwing water on your face 15 minutes before the opening bell just does not give you sufficient time to be prepared for the market's opening. Sitting at your computer in your pajamas or underwear does not put you in the right mindset to attack the market. I know. I've experienced all of these scenarios. In *How to Day Trade for a Living*, I will show you how you too can take control over your life and have success in day trading on the stock market. I love teaching. It's my passion. In this book, I use simple and easy to understand words to explain the strategies and concepts you need to know to launch yourself into day trading on the stock market. This book is definitely NOT a difficult, technical, hard to understand, complicated and complex guide to the stock market. It's concise. It's practical. It's written for everyone. You can learn how to beat Wall Street at its own game. And, as a purchaser of my book, you will also receive a membership in my community of day traders at www.vancouver-traders.com. You can monitor my screen in real time, watch me trade the strategies explained in his book, and ask questions of me and other traders in our private chat room. I invite you to join me in the world of day trading. I'm a real person who you can connect with. I'm not just a photograph here on the Amazon site. I love what I do. You can follow my blog post under Author Updates on my Author page on Amazon. It's honest. You'll see I lose some days. You can read the reviews of my book. I know you will learn much about day trading and the stock market from studying my book. You can join at no cost and with no obligation my community of day traders at www.vancouver-traders.com. When it comes to trading, our reaction to the market is more important than what happens in the markets. This is true for any venture, be it business or sports. The playing conditions are the same for everyone. Then how is it that one sports person achieves amazing success while many others fail to do so? It happens because of that sports person's response to playing conditions were more in sync than other sports persons. Similarly, financial markets are the same for everyone, but only one Warren Buffett achieves tremendous success, where many others have lost their fortunes. This emphasizes that you can learn as much as you want. But ultimately, it will be your actions that determine the ratio of your success in day trading. If you are standing before a mirror, and you want the person in the mirror to raise its arms, what would you do? Would you force the person in the mirror to raise its arms? No. If you raise your arms, the person in the mirror will do the same! Your success in day trading will be a similar exercise, whether you are trading in forex, commodities, stocks, or options. Markets will open, trade, and close. But how you react to those market conditions, will define how successful you are in day trading. So, start reading, and start applying what you have learned now.

Options Trading for Beginners - Matthew Morris 2020-10-20

Do you want to learn how to start options trading for income, day trading for a living, swing trading stocks, forex trading, stock market trading, dividend investing, technical analysis? If yes, then keep reading... Well, you might be thinking what the reason behind options being more dynamic in nature than stocks is? The answer to this is that in stocks, you can have only two definite ways of making money. One is long and the other is short. In the long way, you need to buy a stock and then wait for a long time until the value of the stock goes up and then if you want, you can sell the same for a profit. In the short way, all that you need to do is sell some shares of any company and then buy back the same shares at a later stage at a much lower price. Options are nothing but financial

instruments. Many people also refer to options as contracts as when options are purchased, you are actually obtaining the overall right for trading all the underlying assets that are associated with that very option within a specific date and also at a particular price. But, there comes no fixed obligation for doing so. In simple terms, options are nothing but a mere form of security similar to a stock or a bond. The general nature of options is that they need to play in the short term. So, the investors are always looking out for movement in price in the short term so that it can be easily played in their favor. This movement needs to happen within a few weeks or maximum few months. It might also happen within some days only at times. In this book, you will be learning about the basics of options trading right before opting for advanced aspects of it. There are various fundamental things that you are required to be completely aware of right before you start with trading. It is actually true that there are several options when it comes to investing and there are also several types of financial instruments for accomplishing your actual goal of profit-making. One of the primary financial tools is options. Options are much more versatile and also dynamic when compared to stocks. This book covers: The Basic of Options Trading The Types of Options Trading Options Contracts for Beginner. Steps of Optional Trading Of a Beginner Stock Options Trading Fundamental & Technical Analysis Top Trader Mistakes to Avoid In Options Trading Risks That You Need To Avoi. The Option Trader Mindset The Best Strategies to Invest With Call and Put Options Trading And much more... When it comes to options, it comes along with several ways to make profits of potential nature. You have the choice of trading options not only on the stocks, but you can also do the same on commodities, currencies, and several other indices. Most of the investors, who are novice in nature, tend to get into the stock market without having any kind of prior experience and education. Day Trading is Hard and Most Day Trading "Educators" Don't Actually Day Trade! You heard that right! They don't make their money from stocks, but from the chatroom memberships, video courses, and monthly subscriptions they sell to you! Before we get started, let me first go over what I don't include in this book... • I have no "day trading" chatroom which charges your credit card each month for a service you'll never use. • I have no monthly website subscription service for "more advanced strategies" that are needed to get started, but not included in the book. • I have no Lamborghini I rented to put behind me in a video, or fake money on a table in front of me. What I do have is a book that will teach you how the day trading industry actually works, my own wisdom from being in the stock market for almost a decade, and strategies you can use to actually start day trading. Here's What You'll Learn In This Book: —————▼—————

• Chapter 1: The Industry - In the first part of the book, I peel back the curtain and go over the actual day trading industry with you. I show you how so called "pro" traders are able to fake charts, statistics, and trades to make it appear like they actually make money day trading, when they really don't. I then go over the tactics they use to scam traders, and even a website which exposes all the fake educators. • Chapter 2: Terminology - Here we go over all the terms you'll need to know as we progress to through

the book. Volume, chart types, indicators, order types... it's all covered! • Chapters 3 + 4: Pre-Trading Basics - In these chapters, I go over the basics of day trading. This includes what software and broker to use, finding mentors who you can refer to for help, and what the typical day in the life of a day trader looks like. I then show you how to set up your trading screen, what time frame to use, and the most beneficial types of stocks to trade. • Chapter 5: Day Trading Strategies - This is the heart of the book, and where I spend the most time. In this section, I give you 8 different strategies you can immediately start using to day trade. I include detailed explanations, charts, and examples so you know exactly how to implement the strategies I go over. • Chapter 6: Additional Advice - In the last part of the book, I give you my final bits of advice. This includes how to increase the probability of your trades, using a practice account, and more bits of wisdom I have learned over the years. —————▲————— I must admit to you, day trading is not easy and there is no guarantee of actually making it. However I feel this book gives you the best chance of actually getting started, as well providing a big picture of the day trading industry. If you've been on the fence about day trading, now is your chance to finally learn what it's all about! As a complimentary bonus, only for book buyers, you'll receive my special report titled Crush the Market! This report goes over 14 beneficial tips I have learned throughout my trading career that will help keep your account profitable in the stock market.
