[The Year 1000](#) - Valerie Hansen 2020-04-14

\*A New York Times Book Review Editors' Choice\* From celebrated Yale professor Valerie Hansen, a "vivid" and "astonishingly comprehensive account [that] casts world history in a brilliant new light" (Publishers Weekly, starred review) and shows how bold explorations and daring trade missions first connected all of the world's societies at the end of the first millennium. People often believe that the years immediately prior to AD 1000 were, with just a few exceptions, lacking in any major cultural developments or geopolitical encounters, that the Europeans hadn't yet reached North America, and that the farthest feat of sea travel was the Vikings' invasion of Britain. But how, then, to explain the presence of blond-haired people in Maya temple murals at Chichén Itzá, Mexico? Could it be possible that the Vikings had found their way to the Americas during the height of the Maya empire? Valerie Hansen, an award-winning historian, argues that the year 1000 was the world's first point of major cultural exchange and exploration. Drawing on nearly thirty years of research, she presents a compelling account of first encounters between disparate societies, which sparked conflict and collaboration eerily reminiscent of our contemporary moment. For readers of Jared Diamond's *Guns, Germs, and Steel* and Yuval Noah Harari's *Sapiens*, *The Year 1000* is a "fascinating...highly impressive, deeply researched, lively and imaginative work" (The New York Times Book Review) that will make you rethink everything you thought you knew about how the modern world came to be.

**Strategies that Work** - Stephanie Harvey 2017

In this new edition of their groundbreaking book Strategies That Work, Stephanie Harvey and Anne Goudvis share the work and thinking they've done since the second edition came out a decade ago and offer new perspectives on how to explicitly teach thinking strategies so that students become engaged, thoughtful, independent readers. Thirty new lessons and new and revised chapters shine a light on children's thinking, curiosity, and questions. Steph and Anne tackle close reading, close listening, text complexity, and critical thinking in a new chapter on building knowledge through thinking-intensive reading and learning. Other fully revised chapters focus on digital reading, strategies for integrating comprehension and technology, and comprehension across the curriculum. The new edition is organized around three sections: Part I provides readers with a solid introduction to reading comprehension instruction, including the principles that guide practice, suggestions for text selection, and a review of recent research that underlies comprehension instruction. Part II contains lessons to put these principles into practice for all areas of reading comprehension. Part III shows you how to integrate comprehension instruction across the curriculum and the school day, particularly in science and social studies. Updated bibliographies, including the popular "Great Books for Teaching Content," are accessible online. Since the first publication of Strategies That Work, more than a million teachers have benefited from Steph and Anne's practical advice on creating classrooms that are incubators for deep thought. **Merchants of Culture** - John B. Thompson 2021-04-14

These are turbulent times in the world of book publishing. For nearly five centuries the methods and practices of book publishing remained largely unchanged, but at the dawn of the twenty-first century the industry finds itself faced with perhaps the greatest challenges since Gutenberg. A combination of economic pressures and technological change is forcing publishers to alter their practices and think hard about the future of the books in the digital age. In this book - the first major study of trade publishing for more than 30 years - Thompson situates the current challenges facing the industry in an historical context, analysing the transformation of trade publishing in the United States and Britain since the 1960s. He gives a detailed account of how the world of trade publishing really works, dissecting the roles of publishers, agents and booksellers and showing how their practices are shaped by a field that has a distinctive structure and dynamic. This new paperback edition has been thoroughly revised and updated to take account of the most recent developments, including the dramatic increase in ebook sales and its implications for the publishing industry and its future.

**Vesper Flights** - Helen Macdonald 2020-08-25

From the New York Times bestselling author of *H is for Hawk* and winner of the Samuel Johnson Prize for nonfiction, comes a transcendent collection of essays about the natural world. Animals don't exist in order to teach us things, but that is what they have always done, and most of what they teach us is what we think we know about ourselves. Helen Macdonald's bestselling debut *H is for Hawk* brought the astonishing story of her relationship with goshawk Mabel to global critical acclaim and announced Macdonald as one of this century's most important and insightful nature writers. *H is for Hawk* won the Samuel Johnson Prize for Nonfiction and the Costa Book Award, and was a finalist for the National Book Critics Circle Award and the Kirkus Prize for Nonfiction, launching poet and falconer Macdonald as our preeminent nature essayist, with a semi-regular column in the New York Times Magazine. In *Vesper Flights* Helen Macdonald brings together a collection of her best loved essays, along with new pieces on topics ranging from nostalgia for a vanishing countryside to the tribulations of farming ostriches to her own private vespers while trying to fall asleep. Meditating on notions of captivity and freedom, immigration and flight, Helen invites us into her most intimate experiences: observing the massive migration of songbirds from the top of the Empire State Building, watching tens of thousands of cranes in Hungary, seeking the last golden orioles in Suffolk's poplar forests. She writes with heart-tugging clarity about wild boar, swifts, mushroom hunting, migraines, the strangeness of birds' nests, and the unexpected guidance and comfort we find when watching wildlife. By one of this century's most important and insightful nature writers, *Vesper Flights* is a captivating and foundational book about observation, fascination, time, memory, love and loss and how we make sense of the world around us.
