Polymer Interface and Adhesion - Wu 2017-11-22

Poly mer Interface and Adhesion provides the critical basis for further advancement in this field. Combining the principles of interfacial science, rheology, stress analysis, and fracture mechanics, the book teaches a new approach to the analysis of long standing problems such as: how is the interface formed; what are its physical and mechanical properties; and how does the interface modify the stress field and fracture strength of the material. The book offers many outstanding features, including extensive listings of pertinent references, exhaustive tabulations of the interfacial properties of polymers, critical reviews of the many conflicting theories, and complete discussions of coupling agents, adhesion promotion, and surface modifications. Emphasis is placed on physical concepts and mechanisms, using clear, understandable mathematics. Polymer Interface and Adhesion promotes a more thorough understanding of the physical, mechanical, and adhesive properties of multiphase, polymer systems. Polymer scientists and engineers, surface chemists, materials scientists, rheologists, as well as chemical and mechanical engineers interested in the research, development or industrial applications of polymers, plastics, fibers, coatings, adhesives, and composites need this important news source book.

[Cities for Children](#) - Sheridan Bartlett 2016-04-29

Urban authorities and organizations are responsible for providing the basic services that affect the lives of urban children. Cities for Children is intended to help them understand and respond to the rights and requirements of children and adolescents. It looks at the responsibilities that authorities face, and discusses practical measures for meeting their obligations in the context of limited resources and multiple demands. While the book emphasizes the challenges faced by local government, it also contains information that would be useful to any groups working to

make urban areas better places for children. Cities for Children begins by introducing the concept, history and content of children's rights and the obligations they create for local authorities. The volume then goes on to look at a variety of contentious issues such as housing, community participation, working children, community health, education and juvenile justice. The final section of the book discusses the challenge of establishing systems of governance that can promote the economic security, social justice and environmental care essential for the realization of children's rights. It follows through the practical implications for the structure, policies and practices of local authorities. Written by the top experts in the field of children's issues, and including a resource section which lists publications and organizations that can provide further information and support, this volume is a must for all involved in planning for, and the protection of, children within the urban environment.

Proceedings of the Art and Design International Conference (AnDIC 2016) - Rusmadiyah Anwar 2018-06-18

This book of conference proceedings contains papers presented at the Art and Design International Conference (AnDIC 2016). It examines the impact of Cyberology, also known as Internet Science, on the world of art and design. It looks at how the rapid growth of Cyberology and the creation of various applications and devices have influenced human relationships. The book discusses the impact of Cyberology on the behaviour, attitudes and perceptions of users, including the way they work and communicate. With a strong focus on how the Cyberology world influences and changes the methods and works of artists, this book features topics that are relevant to four key players - artists, intermediaries, policy makers, and the audience - in a cultural system, especially in the world of art and design. It examines the development, problems and issues of traditional cultural values, identity and new trends in contemporary art. Most importantly, the book attempts to discuss the past, present and future of art and design whilst looking at some underlying issues that need to be addressed collectively.
