The New Laws of Love - Marie Bergström 2021-12-21
Online dating has become a widespread feature of modern social life. In less than two decades, seeking partners through commercial intermediaries went from being a marginal and stigmatized practice to being a common

activity. How can we explain this rapid change and what does it tell us about the changing nature of love and sexuality? In contrast to those who praise online dating as a democratization of love and those who condemn it as a commodification of intimacy, this book tells a different story

about how and why online dating became big. The key to understanding the growing prevalence of digital dating lies in what Marie Bergström calls “the privatization of intimacy.” Online dating takes courtship from the public to the private sphere and makes it a domestic and individual practice. Unlike courtship in traditional settings such as school, work, and gatherings of family and friends, online dating makes a clear distinction between social and sexual sociability and renders dating much more discrete. Apparently banal, this privatizing feature is fundamental for understanding both the success and the nature of digital matchmaking. Bergström also sheds light on the persisting inequalities of intimate life, showing that online dating is neither free nor fair: it has its winners and losers and it differs significantly according to gender, age and social class. Drawing on a wide range of empirical material, this book challenges what we think we know about online dating and

gives us a new understanding of who, why, and how people go online to seek sex and love.

L'Ère électrique - The

Electric Age - Olivier Asselin

2011-09-17

La découverte scientifique et la

maîtrise de l'électricité ont bouleversé notre société au même titre que l'invention de l'écriture alphabétique durant l'Antiquité et de l'imprimerie à caractères mobiles au XVI^e siècle. Il ne s'agit pas seulement d'un phénomène naturel mis au service de l'homme par la science, mais d'un élément central de l'épistémè moderne : l'électricité a inspiré des écrivains et des artistes, a servi de force d'impulsion au monde de l'industrie et de l'innovation et a redéfini les comportements sociaux. En explorant l'incidence de l'électricité sur le savoir, les pratiques sociales, les médias, la vie sociale et les expériences personnelles, cet ouvrage tente d'en saisir les aspects techniques et culturels dans toute leur complexité. -- The scientific discovery and mastery of electricity created as many important changes in modern society as did the invention of alphabetical writing in antiquity and movable type in the fifteenth century. It is more than a natural phenomenon that

science has harnessed for human use; it is a central feature of the modern episteme. It has inspired writers and artists, propelled industry and innovation, and reshaped human social behaviour. Looking at a variety of topics including film, politics, and contemporary art, this volume explores the impact of electricity on knowledge, social practices, media, community life, and subjective experience.

The Voices of Nîmes -

Suzannah Lipscomb 2019

Most of the women who ever

lived left no trace of their existence on the record of history. Sixteenth- and seventeenth-century women of the middling and lower levels of society left no letters or diaries in which they expressed what they felt or thought. Criminal courts and magistrates kept few records of their testimonies, and no ecclesiastical court records are known to survive for the French Roman Catholic Church between 1540 and 1667. For the most part, we cannot hear the voices of ordinary French women - but this study allows us to do so. Based on the evidence of 1,200 cases brought before the consistories - or moral courts - of the Huguenot church of Languedoc between 1561 and 1615, *The Voices of Nîmes* allows us to access ordinary women's everyday lives: their speech, behaviour, and attitudes relating to love, faith, and marriage, as well as friendship and sex. Women appeared frequently before the consistory because one of the chief functions of moral

discipline was the regulation of sexuality, and women were thought to be primarily responsible for sexual sin. This means that the registers include over a thousand testimonies by and about women, most of whom left no other record to posterity. Women also featured so prominently before the consistories because of an ironic, unintended consequence of the consistorial system: it empowered women. Women quickly learnt how to use the consistory: they denounced those who abused them, they deployed the consistory to force men to honour their promises, and they started rumours they knew would be followed up by the elders. The registers therefore offer unrivalled evidence of women's agency, in this intensely patriarchal society, in a range of different contexts, such as their enjoyment of their sexuality, choice of marriage partners, or idiosyncratic spiritual engagement. The consistorial registers, therefore, let us see

how independent, self-determining, and vocal women could be in an age when they had limited legal rights, little official power, and few prospects. As a result, this book suggests we need to reconceptualize female power: women's power was not just hidden, manipulative, and devious, but also far more public than historians have previously recognized.

Critical Perspectives on Cameroon Writing - Hansel Ndumbe Eyoh 2013

This landmark volume brings together a very rich harvest of forty critical essays on Cameroon literature by Cameroon literary scholars. The book is the result of the Second Conference on Cameroon Literature which took place at the University of Buea in 1994. The Buea conference was motivated by a determination to look at Cameroon literature straight into its face and criticize it using literary criteria of the strictest kind. Gone were the times when the criticism was complacent because it was

believed that a nascent literature could easily be stifled by application of rather strict cannons of literary criticism. Both writers and critics had a lot to say. Subjects dealt with ranged from general topics on literature, survival and national identity, through specialized articles on prose, poetry, drama, translation, language, folklore, children's literature, Journalism and politics. It is the hope of the volume editors that the publication of these papers will instigate the kind of actions that were recommended and that the prolific nature of Cameroon literature will equally give rise to a prolific and robust criticism.

Intellectual Development of Voltaire - Ira O. Wade 2015-12-08

In this comprehensive study of Voltaire's intellectual development, he provides the first full treatment of the effect of the English experience on

Voltaire, the diversity of activity at Cirey, and the relation of Voltaire's thought to 17th- and 18th-century philosophy. By devoting considerable attention to the movements, the personal relationships, and the environments that influenced Voltaire, Professor Wade is able to illuminate the sources of Voltaire's thought and show at the same time how he wove them into a unique synthesis. A final chapter in the book contains a general summation of the importance of Voltaireanism as a philosophy of life. Originally published in 1969. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the

rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

The concept and measurement of violence -

Walby, Sylvia 2017-02-14 Available Open Access under CC-BY-NC licence. The extent of violence against women is currently hidden. How should violence be measured? How should research and new ways of thinking about violence improve its measurement? Could improved measurement change policy? The book is a guide to how the measurement of violence can be best achieved. It shows how to make femicide, rape, domestic violence, and FGM visible in official statistics. It offers practical guidance on definitions, indicators and coordination mechanisms. It reflects on theoretical debates on 'what is gender', 'what is violence', and 'the concept of coercive control'. and introduces the concept of 'gender saturated context'. Analysing the socially

constructed nature of statistics and the links between knowledge and power, it sets new standards and guidelines to influence the measurement of violence in the coming decades.

Brussels and Europe - Roel de Groof 2009

Fifty years after the conclusion of the Treaties of Rome (25 March 1957) and the foundation of the European Economic Community, Brussels has become a political world city and international capital with global influence. The acta of the interuniversity and international colloquium, held in Brussels on 18 and 19 December 2006, present a general outline of the research results and 26 contributions,

based on original research and divided into three parts. The first part focuses on Brussels' position in the 'world city network'. How has Brussels grown into the European and international 'capital' we know today? What exactly is its legal status as the European 'Capital'? Of course, other aspects such as the relationship between the Brussels-Capital Region and the Europe of Regions and the role of Brussels as the place for lobbying the European Union are also examined. The second part focuses on the interaction between the European institutions and Brussels. What are the socioeconomic, demographic, political and linguistic effects of their presence? Finally, a number of pressure points and areas of tension are analysed. How is Brussels 'imagined' or represented as the capital of Europe? And what is the impact of the European presence on urban planning and security policy? -- Back cover.

**Rape and Writing in the
Heptaméron of Marguerite
de Navarre** - Patricia Francis
Cholakian 1991
Marguerite de Navarre
(1492-1549), the sister of the
French king François I,
composed the Heptaméron as a
complex collection of seventy-
two novellas, creating one of
the first examples of realistic,
psychological fiction in French
literature. These novellas,
framed by debates among ten
storytellers, all noble lords and
ladies, reveal the author's
desire to depart from the
purely masculine voice of the
age. Cholakian contends that
this Renaissance text is
characterized by feminine
writing. She reads the text as
the product of the author's
personal experience. Beginning
her study with the rape
narrative in the
autobiographical novella 4, she
examines how the Heptaméron
interacts with male literary
traditions and narrative

conventions about gender
relations. She analyzes such
words as rape, and honor,
noting how they are defined
differently by men and women
and how these differences in
perception affect the
development of both plot and
character.

Gender, Sex and Translation

- Jose Santaemilia 2015-12-08
Gendered and sexual identities are unstable constructions which reveal a great deal about the ideologies and power relationships affecting individuals and societies. The interaction between gender/sex studies and translation studies points to a fascinating arena of discursive conflict in which our intimate desires and identities are established or rejected, (re)negotiated or censored, sanctioned or tabooed. This volume explores diverse and heterogeneous aspects of the

manipulation of gendered and sexual identities. Contributors examine translation as a feminist practice and/or theory; the importance of gender-related context in translation; the creation of a female image of secondariness through dubbing and state censorship; attempts to suppress the blatantly patriarchal and sexist references in the German dubbed versions of James Bond films; the construction of national heroism and national identity as male preserve; the enactment of Chamberlain's 'gender metaphors' in Scliar and Calvino; the transformation of Japanese romance fiction through Harlequin translations; the translations of the erotic as site for testing the complex rewriting(s) of identity in sociohistorical term; and the emergence of NRTs (New Reproductive Technologies), which is causing fundamental changes in the perception of 'creativity' or 'procreation' as male domains.

Rabies in the Tropics - E.

Kuwert 2012-12-06

Rabies-as in former times-is still today a major killer affecting man and animals especially in many tropical and sub-tropical countries of Asia, Africa and South America. Some 50,000 people and literally millions of animals suffer and die of this disease each year. This dramatic death toll and the enormous economic losses which ensue are nowadays un tolerable and no longer justified. Worldwide strategy for Rabies control has been established and the World Health Organization recently formulated an elimination programme for dog Rabies. Methods for wildlife Rabies control are also under way. For the realisation of control campaigns, careful epidemiological analysis is necessary. This involves: - antigenical characterisation of

Rabies Virus Strains using monoclonal antibodies, - observation of foci, - follow-up of the front wave of the disease, - specific ecology of target populations and Rabies carrier species. The financial point of view of such campaigns has of course to be ascertained. It is for the first time ever that representatives and specialists of different biological disciplines from nearly 70 countries have had the opportunity in Tunis to discuss these important issues and to evaluate, on the basis of their own experimental results and personal epidemiological observations, the possibility of ultimate elimination of Rabies in tropical and sub-tropical countries and also to contribute their share for a better understanding of the natural history of this disease. *Typographical Journal* - 1942

Naming and Mapping the Gods

in the Ancient Mediterranean -

Corinne Bonnet 2022-12-31

Ancient religions are definitely complex systems of gods, which resist our understanding. Divine names provide fundamental keys to gain access to the multiples

ways gods were conceived, characterized, and organized. Among the names given to the gods many of them refer to spaces: cities, landscapes, sanctuaries, houses, cosmic elements. They reflect mental maps which need to be explored in order to gain new knowledge on both the structure of the pantheons and the human agency in the cultic dimension. By considering the intersection between naming and mapping, this book opens up new perspectives on how tradition and innovation, appropriation and creation play a role in the making of polytheistic and monotheistic religions. Far from being confined to sanctuaries, in fact, gods dwell in human environments in multiple ways. They move into imaginary spaces and explore the cosmos. By proposing a new and interdisciplinary angle of approach, which involves texts, images, spatial and archeaeological data, this book sheds light on ritual practices and representations of gods in the whole Mediterranean, from

Italy to Mesopotamia, from Greece to North Africa and Egypt. Names and spaces enable to better define, differentiate, and connect gods.

Complete Works of Jules Verne (illustrated): A Journey To The Centre Of The Earth, From The Earth To The Moon, The Floating Island, The Children Of Captain Grant, Twenty Thousand Leagues Under The Sea -

Jules Verne 2020-08-27

Jules Verne, a 19th-century French author, is famed for such revolutionary science-fiction novels as "Around the World in Eighty Days" and "Twenty Thousand Leagues Under the Sea". He has sometimes been called the "Father of Science Fiction", a title that has also been given to H. G. Wells and Hugo Gernsback. In all, Verne authored more than 60 books (most notably the 54 novels comprising the "Voyages Extraordinaires"), as well as dozens of plays, short stories and librettos. He conjured hundreds of memorable

characters and imagined countless innovations years before their time, including the submarine, space travel, terrestrial flight and deep-sea exploration. Verne is generally considered a major literary author in France and most of Europe, where he has had a wide influence on the literary avant-garde and on surrealism. Verne has been the second most-translated author in the world since 1979, ranking between Agatha Christie and William Shakespeare. Some of the works appear only in their original French texts, due to copyright restrictions.
