includes a list of the major topics covered on the exam organized by the five performance domains—strategic program management, program life cycle, benefits management, stakeholder management, and governance—as presented in the Program Management Professional Examination Content Outline. It also includes helpful tips on how to make the most of the time you have available to prepare for the exam. Just like its bestselling predecessors, this indispensable study guide includes 20 multiple-choice practice questions for each domain along with a comprehensive answer key. The program life cycle domain includes 20 questions for each of the five phases. Each question also has a plainly written rationale for each correct answer with bibliographic references for further study. Two challenging, 170-question practice tests that simulate the actual exam are included in the book and online, so you can retake them

as many times as necessary. They also include a rationale and reference. Scores for the online tests are presented as if each question is rated similarly, but this edition also includes a new component: the authors' own weighting system for the level of difficulty for each question. This system will show you what they feel meets the exam's criteria for Proficient, Moderately Proficient, and below Proficient. You then will see your scores by domain in both approaches. Supplying an insider's look at the questions, terminology, and sentence construction you will encounter on the day of the exam, this indispensable study tool is designed to help you pass the exam and achieve the highly sought after PgMP® certification.

Investigation of Human Factors in Accidents and Incidents - 1993

Human Factors (HF) are involved in most aviation occurrences. To advance aviation safety, we must improve our ability to identify

the involvement of HF in accidents and incidents. This report: provides investigators and investigation authorities, civil aviation regulatory authorities, corp. mgmt., and other aviation personnel with info. on the need for and purpose of the investigation of HF; outlines a methodology for investigating HF in aircraft accidents and incidents; and describes how the information gathered should be reported. The focus is on the events which led up to the occurrence and not on post-accident events, such as search and rescue and survivability.

Human Security in the Mewat district. A feminist perspective - Kusum Iata 2016-12-21
Scientific Essay from the year 2016 in the subject Sociology - Gender Studies, , language: English, abstract: The transformation of gender relations since the beginning of the 20th century is one of most

profound social changes in human history. The history of human civilization thus far has been characterized by male domination in gender relations. Gender inequality refers to the unequal distribution of social positions, status, economic benefits etc on the basis of biological differences and is unfavorable for females due to embedded socio-cultural values throughout the world in general and in India in particular. This gender discrimination takes many forms. Many social practices seen as normal from a religious or cultural point of view (which may have deep historical roots) leave women out of the economic mainstream. These practices may have profound socio-economic consequences because they do not allow society to take advantage of the talent inherent in women. The present study investigates that how despite the legal guarantee of the liberty and equality, especially in part III of the Indian constitution through Article 14, 15 and 16 of the very basic law of the

country, the position of women is pathetic. The data has been collected through a structured questionnaire from 120 female respondents from 3 villages of Mewat district, namely Hassanpur, Sheikhpur and Kalwari. The study found that violence lies in the structure of the society and has a place in the cultural practices which is well exemplified through gender imbalance, lack of access to schooling facilities, lack of personal and political freedom, no say in decision making, forced marriages, few economic opportunities, lack of securing income, pressure to cover the head and body with no personal choices.

The Safe Transport of Radioactive Materials - R.

Gibson 2013-10-22

The Safe Transport of Radioactive Materials is a handbook that details the safety guidelines in transporting radioactive materials. The title covers the various regulations and policies, along with the safety measures and procedures of radioactive material transport.

The text first details the 1963 version of the IAEA regulation for the safe transport of radioactive materials; the regulation covers the classification of radionuclides for transport purposes and the control of external radiation hazards during the transport of radioactive materials. The next chapter deals with concerns in the implementation of the IAEA regulations on both national and international levels. Next, the selection presents a review of transport accidents and incidents. The text also covers the liability and insurance in the transport of radioactive materials, along with the U.K. practice on insurance and indemnity during the transport of radioactive materials. The book will be of great use to individuals involved in the nuclear power industry.

Human Factors in Aviation -

Eduardo Salas 2010-01-30

This edited textbook is a fully updated and expanded version of the highly successful first edition of Human Factors in Aviation. Written for the widespread aviation community - students, engineers, scientists, pilots, managers, government personnel, etc., HFA offers a comprehensive overview of the topic, taking readers from the general to the specific, first covering broad issues, then the more specific topics of pilot performance, human factors in aircraft

design, and vehicles and systems. The new editors offer essential breath of experience on aviation human factors from multiple perspectives (i.e. scientific research, regulation, funding agencies, technology, and implementation) as well as knowledge about the science. The contributors are experts in their fields. Topics carried over from the first edition are fully updated, several by new authors who are now at the fore of the field. New material - which represents 50% of the volume - focuses on the challenges facing aviation specialists today. One of the most significant developments in this decade has been NextGen, the Federal Aviation Administration's plan to modernize national airspace and to address the impact of air traffic growth by increasing airspace capacity and efficiency while simultaneously improving safety, environmental impacts and user access. NextGen issues are covered in full. Other new topics include: High Reliability Organizational Perspective,

New Materials for Next-Generation Commercial Transports - National Research Council 1996-03-15

The major objective of this book was to identify issues related to the introduction of new materials and the effects that advanced materials will have on the durability and technical risk of future civil aircraft throughout their service life. The committee investigated the new materials and structural concepts that

are likely to be incorporated into next generation commercial aircraft and the factors influencing application decisions. Based on these predictions, the committee attempted to identify the design, characterization, monitoring, and maintenance issues that are critical for the introduction of advanced materials and structural concepts into future aircraft.
