**Marketing Research** - Daniel Nunan 2020

"Working as a marketing researcher remains an intellectually stimulating, creative and rewarding career. Marketing research is a huge and growing industry at the forefront of innovation in many sectors of the economy. However, few industries can have been presented with as many challenges and opportunities as those faced by marketing research due to the growing amounts of data generated by modern technology. Founded upon the enormously successful US edition, and building upon the previous five European

editions, the sixth edition of this book seeks to maintain its position as the leading marketing research text, focused on the key challenges facing marketing research in a European context. As with previous editions, this aims to be comprehensive, authoritative and applied. As a result, the book covers all the topics in previous editions while including updates that reflect the changes and challenges that have impacted the marketing research sector since the fifth edition was published. This includes the ever shifting impact of new technologies, the growth of 'insight' and the shifting role of research ethics, for example, through considering the impact of GDPR. This edition has been significantly updated, with new content, updated cases studies and a major focus on the issues and methods generated by new technologies"--

International Marketing Research - Alex Rialp 2006-11-27

The international marketing literature has grown exponentially in recent years in order to offer sufficient support to corporate and public policy-makers confronting today's turbulent global business conditions. However, according to some of the most recent and outstanding critical assessments of international marketing as a field of study, several promising research avenues are still open to further academic research in this scientific discipline. Accordingly, this volume is conceived as a deep exploration of the evolving nature of the international marketing discipline attending to the diverse sources of emerging opportunities and challenges currently confronting this field of research in the earliest years of this century. The papers in this volume approach this issue from different perspectives. Special consideration is given to firms' export behavior and performance as perhaps still the most relevant, but not the only international marketing strategy among SMEs in both developed and emerging economies. However, strategic internationalization processes in different sectoral contexts (manufacturing, hi-tech and service sectors, and also retailing) are also widely considered in this volume. Of course, the evolving nature of firms' internal capabilities and of shifting environmental forces, which become crucial issues mostly from the international marketers' perspective, are also outlined. Finally, more specific attention is devoted to the increased impact associated with the so-called information technology revolution (especially, the Internet) on business internationalization and international marketing policies and practices. Whereas the primary target readers of this volume are surely scholars and students generally interested in international business/marketing or even international entrepreneurship disciplines, both practitioners and policy-makers in this field should also find relevant insights into their current and future activities. Emerging Issues in Global Marketing - James Agarwal 2018-03-28

This book examines emerging theories, frameworks, and applications of global marketing for the 21st century. It highlights how global marketing is changing in a globalized and digital economy that is fast increasing in complexity and uncertainty. The traditional approach to global marketing is no longer sufficient to address the emerging issues in global markets. Global companies need to challenge traditional assumptions in global marketing in an era of shifting political, cultural, economic, and technological changes. They need to take a fresh look at the contemporary threats and opportunities in markets, institutions, and technology and how they affect entry and expansion strategies through careful re-calibration of the marketing-mix. This book offers new insights for global marketing that addresses these issues. This book should be an ideal resource to both academic scholars and reflective practitioners globally such as CEOs and chief marketing officers as well as government officials and policy makers interested in formulating strategies/policies for global marketing activities in the face of a globalized and digitized economy. This well-crafted research volume is an excellent addition to the growing literature on new trends in international marketing. The authors present the latest insight on the impact of phenomena such as cross-border e-commerce and digital markets, and they discuss new tools for political risk assessment, international branding and more broadly the reconfiguring of marketing-mix strategies - A powerful reminder that the new global market remains a rugged landscape. - Alain Verbeke, McCaig Research Chair in Management and Editor-in-Chief Journal of International Business Studies, University of Calgary, Canada. Emerging trends in institutions, markets, and societies, along with new technological advances, are redefining the scope and strategy in global marketing. Professors Agarwal and Wu have assembled a remarkable collection of cutting-edge topics and issues that capture the shifting paradigm and contemporary developments in the global marketing field. This is an informative and timely resource that makes a valuable contribution, useful for both scholars and business practitioners of global marketing. - Constantine S. Katsikeas, Arnold Ziff Endowed Research Chair in Marketing & International Management, Editor-in-Chief Journal of International Marketing, University of Leeds, UK. This book presents new and cutting-edge thinking at a time when the traditional views of international marketing need to be scrapped. Convergence forces are creating new opportunities as well as threats on a daily basis, and marketing practitioners as well as scholars must be forewarned as well as forearmed on how to deal with these changes. The real growth is coming from the emerging nations, and the theories that provided sufficient insights ten years ago have been completely outmoded by the ever-accelerating rate of innovation and technological change as well as the pressures to address the needs of all of the firm's relevant stakeholders. The strategic insights provided here are absolutely invaluable. Don't miss an opportunity to read this book!! - John B. Ford, Professor of Marketing & International Business, Eminent Scholar & Haislip-Rohrer Fellow, Editor-in-Chief, Journal of Advertising Research, Old Dominion University, USA. *The Handbook of Marketing Research* - Rajiv Grover 2006-06-23

The Handbook of Marketing Research: Uses, Misuses, and Future Advances comprehensively explores the approaches for delivering market insights for fact-based decision making in a market-oriented firm. Divided into four parts, the Handbook addresses (1) the different nuances of delivering insights; (2) quantitative, qualitative, and online data gathering techniques; (3) basic and advanced data analysis methods; and (4) the substantial marketing issues that clients are interested in resolving through marketing research.

**Entrepreneurship Marketing** - Sonny Nwankwo 2020-02-26

Small and medium-sized enterprises (SMEs) dominate the market in terms of sheer number of organisations; yet, scholarly resource materials to assist in honing skills and competencies have not kept pace. This well renowned textbook guides students through the complexities of entrepreneurship from the unique perspective of marketing in SME contexts, providing a clear grounding in the principles, practices,

strategies, challenges, and opportunities faced by businesses today. SMEs now need to step up to the terrain of mobile marketing and consumer-generated marketing and utilise social media marketing tools. Similarly, the activities of various stakeholders in SME businesses like start-up accelerators, business incubators, and crowdfunding have now gained more prominence in SME activities. This second edition advances grounds covered in the earlier edition and has been fully updated to reflect this new, dynamic business landscape. Updates include: A consideration of social media imperatives on SME marketing; Discussion of forms of capital formation and deployment for marketing effectiveness, including crowdfunding; Updated international case studies drawn from diverse backgrounds; Hands-on practical explorations based on real-life tasks to encourage deeper understanding. This book is perfect for students studying SMEs, Marketing and Enterprise at both advanced undergraduate and postgraduate levels, as well as professionals looking to obtain the required knowledge to operate their businesses in this increasingly complex and turbulent marketing environment.

**Applied Ethics in Management** - Shitangsu K. Chakraborty 2012-12-06

Ethical issues are emerging as the most important managerial challenge in all spheres of organizational life, from the wider issues of strategy-making, finance, technology, marketing, information systems to the subtle concerns of gender, demography or cultural diversity. The competitive market-economy model has widened the scope for managers in all countries to violate the fundamental values and integrity needed to maintain and enrich a civil society. These violations stretch from personal lapses of bribery and corruption to the wider areas of moral questions related to an ethically grounded global business system. This book

grew out of a three-day international workshop addressing these issues, held at the Management Centre for Human Values (MCHV), Indian Institute of Management, Calcutta, during February 1998. The workshop explored topics of applied management by providing multiple perspectives. Eighteen of the papers have been chosen for this volume, covering business functions, strategies and alliances. One of the key objectives of the workshop was to integrate ideas of applied ethics developing from Asia, Australia and Europe. Any book on applied ethics must be founded on a multicultural base and be practically oriented. This project has been greatly privileged in drawing together the work of 18 very senior and widely experienced academics and practitioners, spanning four continents. The two editors, from different continents, communicated regularly with each other and the contributors. The book is a result of the support and encouragement of many individuals.

**International Marketing Compact** - F. Zeynep Bilgin 2014-10-24

International Marketing Compact offers a new perspective in teaching international marketing. The authors address issues in a novel way by bringing in cases from advanced and emerging markets. In this connection they also discuss technological requirements of the 21st century and how these developments necessitate a change in looking at international marketing issues. The individual chapters follow the necessary steps to develop and implement projects successfully in the international market place. The knowledge, which is provided for both students and practitioners, is well balanced in terms of theoretical input and managerial application. This is the result of numerous examples presented in this book not only from Europe, but also from other markets throughout the world. The book is addressed to various student groups: those in a bachelor's program studying business, economics and international trade can well use the book to gain a broad and current perspective on trends in international marketing theory and practice. Those in a master's program for business, economics and international trade can use the book as a guide for building a theoretical background for their term projects and the case studies they analyze. Those at the PhD level in the same or similar disciplines can take a compact look at 21st century international marketing. It is also beneficial for international students, for example, for Erasmus students at European universities, who are building a common international marketing background and perspective that they can take back to their studies at their home universities.
