Love and Sex in Islam - Abdullah R. Muhametov  
2013-04-15

Everything you wanted to know about sex and love in Islam, but were hesitant to ask about: polygamy, contraception allowed by Sharia, oral and group sex, homosexual marriages and also the relationship with jinns, masturbation and

mysteries of martial relations - all that is allowed and all that is prohibited in sexual relations in this noble and pure religion. Many people both in the West and Russia continue to have a mistaken illusion that love, sex and variability of relations between man and woman are either suppressed in Islam or in contrary exceed all

norms of decency. the book is an insight into this matter. The Muslim man is perceived as an ideal type of an always ready sexual partner. Love and Sex in Islam lifts the veil covering the delicate theme, in which the phenomena seeming incompatible turn out to be good neighbors.

*Penile Disorders* - Hartmut Porst 1997-04-17  
This book contains a compilation of papers

based on presentations made at the International Symposium on Penile Disorders held in Hamburg, Germany, 26-27 January 1996, under the Chairmanship of Hartmut Porst. This was a unique conference in that it comprehensively addressed various disorders that affect the organ situated at the "center of the male", the penis. As an important beginning, the sociocultural aspects of the erect phallus were presented by G. Wagner from Copenhagen. The anatomy of the penis and the physiological conditions of erection were then discussed by K. -P. J Unemann from Mannheim, Germany. Previous conferences on the penis had concentrated only on specific areas of disease such as impotence. However, it became readily apparent that at this conference something new for almost every aspect of disease would be discussed, including congenital disorders such as hypospadias and epispadias, sexually transmitted and noninfectious dermatological diseases, and congenital and acquired penile

curvatures and penile fractures. An excellent presentation of managing penile cancer by stage related therapeutic decision was presented by S. C. Müller from Bonn, Germany. There is no better person to present a discussion of Peyronie's disease in 1996 from a historical and management perspective than J. Pryor from London, UK. This same degree of expertise was also demonstrated by I. Saenz de Tejada from Madrid, Spain, regarding priapism.

**Emergency General Surgery** - Carlos V. R. Brown 2018-11-09

The field of emergency general surgery encompasses a wide array of surgical diseases, ranging from the simple to the complex. These diseases may include inflammatory, infectious, and hemorrhagic processes spanning the entire gastrointestinal tract. Complications of abdominal wall hernias, compartment syndromes, skin and soft tissue infections, and surgical diseases are significantly complex in special populations, including elderly, obese, pregnant, immunocompromised, and cirrhotic patients. This book covers emergency general surgery topics in a succinct, practical and understandable fashion. After reviewing the

general principles in caring for the emergency general surgery patient, this text discusses current evidence and the best practices stratified by organ system, including esophageal, gastroduodenal, hepatobiliary and pancreatic, small and large bowel, anorectal, thoracic, and hernias. Chapters are written by experts in the field and present a logical, straightforward, and easy to understand approach to the emergency general surgery patient, as well as provide patient care algorithms where appropriate. **Emergency General Surgery: A Practical Approach** provides surgeons and surgery residents with a practical and evidence-based approach to diagnosing and managing a wide array of surgical diseases encountered on emergency general surgery call.

**A Textbook On Professional Ethics And Human Values** - R.S. Naagarazan 2007-12  
This book is the fruition of four decades of

teaching Mechanical Engineering subjects including Quality Engineering, Total Quality Management, and Principles of Management for the Bachelor and Master degree courses in Engineering at Annamalai University, and then in Arunai Engineering College, Tiruvannamalai, by the author. Frank and continual feed back from the distinguished students and esteemed colleagues of the author obtained during teaching, enthused him in shaping this book into a valuable present to the scholars pursuing engineering. This book amply covers the updated syllabus of Professional Ethics by Anna University. Besides the basic human values, Codes of ethics of major Indian professional societies, detailed risk analysis with illustrative examples are included. Further, twenty four crisp case studies covering a wide spectrum of topics in Professional Ethics, short-answer questions, long-answer questions with hints have been appended to sustain the interest of the engineering students. Besides the prescribed

syllabus, ethics-related topics such as Social Acceptability SA 8000, Safety System OHSAS 18001 and Engineer-Manager interactions have also been explained. The student community as well as the teaching fraternity is certain to enjoy using this book, not only from the teaching-learning point of view, but also for their professional career and advancement.

**ECG Interpretation** - Lippincott Williams & Wilkins 2007-03

Geared to LPNs/LVNs, this quick-reference pocket book provides an easy-to-understand guide to ECG interpretation and features over 200 clearly explained ECG rhythm strips. Following a refresher on relevant cardiac anatomy, physiology, and electrophysiology, the book presents the 8-step method for reading any rhythm strip. Subsequent chapters explain various cardiac rate and rhythm abnormalities, including sinus node arrhythmias, atrial arrhythmias, junctional arrhythmias, ventricular arrhythmias, and atrioventricular blocks.

Arrhythmias are covered in a consistent format—causes, significance, ECG characteristics, signs and symptoms, and interventions. Coverage also includes ECG characteristics of disorders, drugs, pacemakers, and implantable cardioverter-defibrillators and a chapter on basic 12-lead electrocardiography.

**Peyronie's Disease** - Laurence A. Levine  
2007-11-19

In this guidebook, international authorities review the current nonsurgical and surgical therapeutic options for dealing with Peyronie's disease. A variety of state-of-the-art research techniques is discussed. As the first medical text on the subject, this book provides an up-to-date summary of the etiology, natural history, and pathophysiology of this disease. Also discussed are the many misconceptions about Peyronie's disease.

**The Making of Neoclassical Economics (Routledge Revivals)** - John F. Henry  
2012-07-26

First published in 1990, this unique explanation of the rise of neoclassical economics views social change as an engine promoting change in theory. It attempts to develop a theory of the origins, consolidation and rise to dominance of the neoclassical school of thought. In so doing, it addresses the contest between the labour and utility theories of value; both are placed in historical context, and reasons are offered for the relative success of each in particular historical periods. It is argued that the eventual dominance of neoclassicism, a theory based on the social changes then taking place, resulted not from its scientific superiority but from its non-social perspective which ignores the social order upon which it depends.

**Short-Scar Face Lift** - Patrick L. Tonnard  
2007-07-01

In the highly popular MACS-Lift Short-Scar Rhytidectomy, Drs. Patrick Tonnard and Alexis Verpaele introduced surgeons to an exciting new concept in facial rejuvenation—one that offered

shorter incisions, minimal morbidity, and reduced recovery time. In this companion volume, *Short-Scar Face Lift: Operative Strategies and Techniques*, Drs. Tonnard and Verpaele build on that foundation and expand their scope. The book is organized into two sections. Part I, *Short-Scar Face-Lift Techniques*, discusses indications, applications, and alternate short-scar face-lift techniques. The editors elaborate on the different aspects of the MACS-lift and short-scar face-lifting. They review the important lessons they have learned during years of experience with the MACS-lift, including a discussion of complications, problems, limitations, and technical tips and tricks. They are joined by Dr. Foad Nahai, who discusses technical considerations; Dr. Joseph Hunstad, who provides a systematic step-by-step guide to his approach; Dr. Mark Jewell, who describes the biomechanics of the MACS-lift and offers technical tips for success; and Dr. Daniel Baker, who describes his personal lateral SMASectomy

short-scar face-lift technique and compares it to other comparable and convergent techniques. Part II focuses on Combined Approaches and Ancillary Treatments for facial rejuvenation. In this section, Dr. Daniel Labb discusses the anatomic basis of minimally invasive neck correction through a short scar and Dr. Alain Fogli details his simple, safe technique for temporal lifting. Finally, Dr. Thomas Roberts brings all of these techniques and treatments into perspective through his analysis of the volumetric concept of facial rejuvenation. He provides an in-depth discussion of facial fat micrografting and describes how the synergistic use of multiple surgical and nonsurgical modalities can lead to superior results. With beautiful, four-color illustrations, numerous case examples, and an accompanying DVD with operative videos, this book provides the ultimate surgical instruction that will allow surgeons to incorporate this procedure into their practice. *Directions in Number Theory* - Ellen E. Eischen  
2016-09-26

Exploring the interplay between deep theory and intricate computation, this volume is a compilation of research and survey papers in number theory, written by members of the Women In Numbers (WIN) network, principally by the collaborative research groups formed at Women In Numbers 3, a conference at the Banff International Research Station in Banff, Alberta, on April 21-25, 2014. The papers span a wide

range of research areas: arithmetic geometry; analytic number theory; algebraic number theory; and applications to coding and cryptography. The WIN conference series began in 2008, with the aim of strengthening the research careers of female number theorists. The series introduced a novel research-mentorship model: women at all career stages, from graduate students to senior members of the community, joined forces to work in focused research groups on cutting-edge projects designed and led by experienced researchers. The goals for Women In Numbers 3 were to establish ambitious new collaborations between women in number theory, to train junior participants about topics of current importance, and to continue to build a vibrant community of women in number theory. Forty-two women attended the WIN3 workshop, including 15 senior and mid-level faculty, 15 junior faculty and postdocs, and 12 graduate students.

**Maya the Golden Veil** - Ashwini Kumar

Aggarwal 2018-12-18

Our scriptures define Maya in many words and stories, using parables and analogies. This world is just an appearance. It is a seeming projection. Even though most of us have heard it and commonly use the word MAYA, we do not really know what it is and thus overcoming it is out of the question. This book attempts to throw light on this subtle reality in carefully chosen words that are easily understood, and perhaps point a way for the serious seeker who is struggling to escape its clutches. What is Maya 1. It is neither Truth 2. Nor is it unTruth 3. And it is neither both Ponder...ponder...ponder... Let us read between the lines to arrive at: 1. Maya is not Truth - replace Truth with its synonym Existence. This sentence becomes Maya Truth Maya Existence

The Molecule of More - Daniel Z. Lieberman  
2018-08-14

Why are we obsessed with the things we want only to be bored when we get them? Why is

addiction perfectly logical to an addict? Why does love change so quickly from passion to indifference? Why are some people die-hard liberals and others hardcore conservatives? Why are we always hopeful for solutions even in the darkest times—and so good at figuring them out? The answer is found in a single chemical in your brain: dopamine. Dopamine ensured the survival of early man. Thousands of years later, it is the source of our most basic behaviors and cultural ideas—and progress itself. Dopamine is the chemical of desire that always asks for more—more stuff, more stimulation, and more surprises. In pursuit of these things, it is undeterred by emotion, fear, or morality. Dopamine is the source of our every urge, that little bit of biology that makes an ambitious business professional sacrifice everything in pursuit of success, or that drives a satisfied spouse to risk it all for the thrill of someone new. Simply put, it is why we seek and succeed; it is why we discover and prosper. Yet, at the same

time, it's why we gamble and squander. From dopamine's point of view, it's not the having that matters. It's getting something—anything—that's new. From this understanding—the difference between possessing something versus anticipating it—we can understand in a revolutionary new way why we behave as we do in love, business, addiction, politics, religion—and we can even predict those behaviors in ourselves and others. In *The Molecule of More: How a Single Chemical in Your Brain Drives Love, Sex, and Creativity—and will Determine the Fate of the Human Race*, George Washington University professor and psychiatrist Daniel Z. Lieberman, MD, and Georgetown University lecturer Michael E. Long present a potentially life-changing proposal: Much of human life has an unconsidered component that explains an array of behaviors previously thought to be unrelated, including why winners cheat, why geniuses often suffer with mental illness, why nearly all diets fail, and

why the brains of liberals and conservatives really are different.

*Anticipating India* - Shekhar Gupta 2014-04-22

How many, in a Mumbai room full of Hermes ties and finance whizkids, are Dalit? What if Mahesh Bhatt's son, David Headley's friend, had been a Muslim? Why is Delhi getting better as a city and Mumbai going downhill? When did the Congress first start shrinking its prime minister? When did it become clear that Narendra Modi would take over his party? Who are the HMTs? And what does an angry Arvind Kejriwal say about us? Raising such questions is the hallmark of Shekhar Gupta's National Interest, the most

eagerly awaited news and current affairs column in Indian journalism. Informed by three decades and more of formidable reporting and a credibility that gives Gupta unrivalled access to decision makers in government, politics and business, the best of these columns in *Anticipating India* explain and interpret, provoke and predict change for more than a billion people. A riveting first draft of modern Indian history, *Anticipating India* interprets everything from the successes and failings of Atal Bihari Vajpayee and Manmohan Singh to the ascent of Rahul Gandhi, Narendra Modi and Arvind Kejriwal, from the forces that have deepened Indian federalism and constitutionalism to the public mood that keeps a check on excesses in the use of political power. Each chapter in *Anticipating India*, in its questioning of power, its use and abuse, carries within it ideas of India that challenge conventional wisdom, shatter stereotypes and, in the end, question our long-held assumptions of who we are as a nation and

a people.

**Happiness Unlimited** - Sister Shivani 2019  
In these enlightening and eye-opening conversations, the renowned spiritual mentor, Sister BK Shivani reveals how to create a life of joy, contentment and bliss, because we all have

the choice and the power to do so. According to her, the reason why there is so little happiness in the world is dependency. Happiness is not dependent on 'anything' or 'anyone', or found 'anywhere'. We keep delaying our happiness until things are just right in our life. We think we will be happy in the future and then wonder why we are not happy now. Happiness is only possible when we are able to accept everyone as they are, at every moment, in every situation. This book is a medium for the awakening and acceptance of self-responsibility. Helping us choose our thoughts and feelings aligned with our true nature of purity, peace and love. To make us shift from asking to sharing; from holding on to letting go; from expectations to acceptance; from the past and the future to being in the now. Happiness is a 'decision', not a 'consequence'.
