Monte Carlo Rally - Graham Robson 2007-11-15  
Hundreds of entrants, in cars of all shapes and sizes, battled through mid-winter snow, fog, ice and darkness from far-flung starting points towards the magical principality of Monaco. Mishaps, breakdowns and smashes abounded, and competitors had tales to tell of cars teetering on the edge of precipices or rammed into snowbanks, frantically improvised repairs,

close encounters and feats of crazy bravado. The first rally was run in 1911, with just 20 starters. In 1930 there were 100, in 1949 205, and in the peak year, 1953, there were no less than 404. In this book every Monte Carlo Rally held between 1911 and 1980 is covered individually, with results listings and route maps. As the years unfold we see the successes of Hotchkiss in the late 1940s, Sunbeam-Talbot in the early 1950s, Mini-Cooper in the 1960s, Porsche 911 in the late '60s, and the dominance of Alpine Renault and Lancia Stratos in the 1970s. The author also provides essential information on regulations, routes, on what competitors were required to do, on the tests held after arrival in Monaco, on classes of entries, and on the various Concours, including for instance the Concours de Confort, that were there to be won. Thus a complete picture of the aims and nature of the rally as it evolved is formed. Written by the world's leading rally historian, and featuring more than 300 archive photographs, this book provides

both the definitive history of the greatest motor rally of all time and an evocative view of a golden age of motoring history.

**No Buddy Left Behind** - Terri Crisp 2012-11-06  
No Buddy Left Behind unveils the life-altering relationships American troops serving in the Middle East have shared with the stray dogs and cats they've rescued from the brutalities of war. Overcoming monumental obstacles, Operation Baghdad Pups' program manager Terri Crisp makes it her mission to save these wartime "buddies," get them out of danger, and bring them home to the soldiers who love them. How

exactly does someone get animals out of a country at war when normal resources are lacking and every step of a plan to transport animals could get you arrested, kidnapped, or blown apart? As Crisp soon learns, each rescue mission from first to last is a fly-by-the-seat-of-your-pants experience, and no animal is truly safe until its paws touch U.S. soil. Terri and her team have saved the lives of 223 dogs and forty-two cats befriended by military personnel since February 2008—and No Buddy Left Behind finally tells this story.

Car Tourism - Waldemar Cudny 2017-07-05  
This book examines the role of cars and the space connected with their production and presentation in tourism development. It describes the role played by experiences and experience societies formed in the 20th c. in the development of contemporary tourism, including

tourism related to cars. The book explores the influence of experiencing unusual events, such as car races, car fairs, visits to car industry museums or multifunctional spaces connected with producing and exhibiting cars (e.g. Autostadt or Audi Forum) on the development of a new type of tourism, i.e. car tourism. This kind of tourism is novel in two ways: firstly, it is a new phenomenon in science, as so far it has not been thoroughly studied or described, apart from various short articles. Secondly, this type of tourism has developed on a large scale only in recent years, mainly due to the huge investments made by powerful European car manufacturers (e.g. Autostadt, Audi Forums, Porsche Museum, Lamborghini Museum etc.). The book presents cars and the spaces related to them as tourist assets (sites, events) and as tourist products that satisfy tourists' needs. Moreover, it connects the issue of car tourism to the marketing strategies of large car manufacturers and discusses the theory of

tourism space, highlighting the main tourism spaces in which car tourism develops. It presents multifunctional spaces (factories, adventure centres - Autostadt in Wolfsburg), museums, car exhibitions, and race tracks. In the next chapter, following an introduction to the problem of events, the author describes events related to car tourism, including races, rallies, driving schools and car fairs. The book ends with a summarizing chapter, which includes a model of the function of car tourism as a separate type of tourism, as well as a discussion presenting the main features, advantages and disadvantages of car tourism in the context of the tourism space theory.

*Memories of My Town* - Åström Anna-Maria  
2018-06-15

The volume *Memories of my Town* is an exploration into how town dwellers experience their environment in a complicated way. As people in urban milieus relate themselves to the environment, this takes place on many levels,

where especially the time level becomes problematic. The urban buildings and settings can be looked upon as a kind of collective history, as carriers or witnesses of times past. But it is only the town dwellers that experience urban time itself, the time they live in, but through their memories also times past. In this past some elements take symbolically dense expressions. Through reliving and narrating their experiences the symbolically important factors in the this urban relationship will be outlined for investigations concerning three towns, Helsinki, the capital, Viborg, the ceded and lost Carelian town, and Jyväskylä, a town with dense commercial and civilisatory dimensions in the middle of Finland. The symbolic aspects are the kern in all the articles of the book *Memories of my Town*. The aim of the book and its articles has been to use different theoretical concepts as guidelines in analysing the different narrative texts. Thus the articles are to be seen as independent

contributions to the scientific discussion about places, urbanism, memories and narratives. The ethnological outlook is on the other hand an outcome of the joint project *Town Dwellers and their Places.*, whereby the articles substancially relate to one another. Thus the book can also be seen as a joint result of this urban project, which was sponsored by the Finnish Academy.

**It's a Dog Not a Toaster** - Diana Kerew-Shaw 2011-06

Most books on competitive obedience focus on the training and ring skills you need to be a winner with your dog in the ring-and that's great. However if you find competing stressful or think you and your dog will not "succeed" against the "best" the key is defining success in a way that will make the sport enjoyable for you. Author Diana Kerew-Shaw takes on the subject of "how to find your fun" in *It's a Dog Not a Toaster*, showing you how you can learn to enjoy the sport, even if your Basset Hound never comes close to a qualifying score.

**Rally Cars** - Reinhard Klein 2000  
Since the very birth of the motor car, man has devised an array of motor sport challenges. The hugely popular sport of World Championship rallying provides the most varied and demanding of all these environments. For nearly half a century, a multitude of car manufacturers from all over the world, both great and small, have recognised it and risen to the challenge. This lavishly illustrated book provides a detailed insight into the technical evolution of the rally car from its modest beginnings to the present day. There have been close to 200 rally cars which have made a significant impact on the international history of the sport and this book documents them extensively, combining the photographic and writing skills of a contrasting yet complimentary editorial quartet, in addition to the views of many respected and distinguished alumni from the sport.

**Awesome Obedience** - Hannah Branigan
