No Other Home - Matt Besler 2017-11-07

Sporting Kansas City captain Matt Besler has achieved something extraordinary in the least extraordinary way. At every level of his athletic career, Besler has heard the same questions and initial dismissal of his talent. Even as he made his slow, steady progression into the consciousness of his coaches, opponents, and fans, then onto the national and world soccer stage, he heard it still. How does a normal guy like Matt Besler end up playing in the World Cup, one of the most exclusive competitions in international sports? If it's true that he's a rather typical Midwestern guy, it's also true that Matt happens to be one of the best soccer players in the country. Professional soccer is a bastion for the flamboyant—the lifestyles, the hairstyles, the WAGs, the passionate fans—yet Matt has flourished as the anti-flamboyant. He is preternaturally calm. He is stalwart. He is relentlessly committed to his preparedness and his athletic success. Matt Besler may seem to be Mr. Average, but it is this very characteristic that has made him exceptional. *No Other Home* offers an honest, first-person perspective into exactly what it takes to reach the highest levels of the sporting world. Matt shares his stories—from growing up in a loving but fiercely competitive family, to climbing through the ranks of high school, club, and college athletics, to dealing with injuries and professional setbacks, and even to his own rather extraordinary experience of becoming a father. The poignant lessons he's learned so far hold value for soccer fans and nonfans alike. This is a book to be shared among family members, young and old. And for parents looking for positive influences in professional athletics, they will find no better role model than Matt. A portion of the proceeds from the sale of this book will be donated to the nonprofit charity, the BESLER FAMILY FOUNDATION.

The Time Seller - Fernando Trías De Bes 2007-01-06

The Time Seller, the second book of business fiction from Fernando Trías de Bes—author of the international acclaimed bestseller *Good Luck*—is not your standard business model book nor a “get with the program” corporate drone story. It breaks the mold and offers a funny (and perhaps existential) meditation on time, work, meaning, and the true costs of “selling out” to the system. Trías de Bes has written an acerbic commentary that seeks to awaken those bound to a routine that has become the source of alienation.

Homer's Odyssey - Gwen Cooper 2009-08-25

ONCE IN NINE LIVES, SOMETHING EXTRAORDINARY HAPPENS. The last thing Gwen Cooper wanted was another cat. She already had two, not to mention a phenomenally underpaying job and a recently broken heart. Then Gwen's veterinarian called with a story about a three-week-old eyeless kitten who'd been abandoned. It was love at first sight. Everyone warned that Homer would always be an “underachiever.” But the kitten nobody believed in quickly grew into a three-pound dynamo with a giant heart who eagerly made friends with every human who crossed his path. Homer scaled seven-foot bookcases with ease, survived being trapped alone for days after 9/11 in an apartment near the World Trade Center, and even saved Gwen's life when he chased off an intruder who broke into their home in the middle of the night. But it was Homer's unswerving loyalty, his infinite capacity for love, and his joy in the face of all obstacles that transformed Gwen's life. And by the time she met the man she would marry, she realized that Homer had taught her the most valuable lesson of all: Love isn't something you see with your eyes. BONUS: This edition contains a new afterword and an excerpt from Gwen Cooper's *Love Saves the Day*.

Stalin's Agent - Boris Volodarsky 2015

This is the history of an unprecedented deception operation - the biggest KGB deception of all time. It has never been told in full until now. There are almost certainly people who would like it never to be told. It is the story of General Alexander Orlov. Stalin's most loyal and trusted henchman during the Spanish Civil War, Orlov was also the Soviet handler controlling Kim Philby, the British spy, defector, and member of the notorious 'Cambridge Five'. Escaping Stalin's purges, Orlov fled to America in the late 1930s and lived underground. He only dared reveal his identity to the world after Stalin's death, in his 1953 best-seller *The Secret History of Stalin's Crimes*, after which he became perhaps the best known of all Soviet defectors, much written about, highly praised, and commemorated by the US Congress on his death in 1973. But there is a twist in the Orlov story beyond the dreams of even the most ingenious spy novelist: 'General Alexander Orlov' never actually existed. The man known as 'Orlov' was in fact born Leiba Feldbin. And while he was a loyal servant of Stalin and the controller of Philby, he was never a General in the KGB, never truly defected to the West after his 'flight' from the USSR, and remained a loyal Soviet agent until his death. The 'Orlov' story as it has been accepted until now was largely the invention of the KGB - and one perpetuated long after the end of the Cold War. In this meticulous new biography, Boris Volodarsky, himself a former Soviet intelligence officer, now tells the true story behind 'Orlov' for the first time. An intriguing tale of Russian espionage and deception, stretching from the time of Lenin to the Putin era, it is a story that many people in the world's intelligence agencies would almost definitely prefer you not to know about.

Generation Kill - Evan Wright 2005-02-01

Based on Evan Wright's National Magazine Award-winning story in Rolling Stone, this is the raw, firsthand account of the 2003 Iraq invasion that inspired the HBO® original mini-series. Within hours of 9/11, America's war on terrorism fell to those like the twenty-three Marines of the First Recon Battalion, the first generation dispatched into open-ended combat since Vietnam. They were a new pop-culture breed of American warrior unrecognizable to their forebears—soldiers raised on hip hop, video games and The Real

World. Cocky, brave, headstrong, wary and mostly unprepared for the physical, emotional and moral horrors ahead, the "First Suicide Battalion" would spearhead the blitzkrieg on Iraq, and fight against the hardest resistance Saddam had to offer. Hailed as "one of the best books to come out of the Iraq war" (Financial Times), Generation Kill is the funny, frightening, and profane firsthand account of these remarkable men, of the personal toll of victory, and of the randomness, brutality and camaraderie of a new American War.

Can You Learn to Be Lucky? - Karla Starr 2018-08-14

"I don't know when I've been so wowed by a new author" –Chip Heath, co-author of The Power of Moments and Switch A talented journalist reveals the hidden patterns behind what we call "luck" -- and shows us how we can all improve outcomes despite life's inevitable randomness. "Do you believe in luck?" is a polarizing question, one you might ask on a first date. Some of us believe that we make our own luck. Others see inequality everywhere and think that everyone's fate is at the whim of the cosmos. Karla Starr has a third answer: unlucky, "random" outcomes have predictable effects on our behavior that often make us act in self-defeating ways without even realizing it. In this groundbreaking book, Starr traces wealth, health, and happiness back to subconscious neurological processes, blind cultural assumptions, and tiny details you're in the habit of overlooking. Each chapter reveals how we can cultivate personal strengths to overcome life's unlucky patterns. For instance: • Everyone has free access to that magic productivity app—motivation. The problem? It isn't evenly distributed. What lucky accidents of history explain patterns behind why certain groups of people are more motivated in some situations than others? • If you look like an underperforming employee, your resume can't override the gut-level assumptions that a potential boss will make from your LinkedIn photo. How can we make sure that someone's first impression is favorable? • Just as people use irrelevant traits to make assumptions about your intelligence, kindness, and trustworthiness, we also make inaccurate snap judgments. How do these judgments affect our interactions, and what should we assume about others to maximize our odds of having lucky encounters? We don't always realize when the world's invisible biases work to our advantage or recognize how much of a role we play in our own lack of luck. By ending the guessing game about how luck works, Starr allows you to improve your fortunes while expending minimal effort.

ECONned: How Unenlightened Self Interest Undermined Democracy and Corrupted Capitalism - Yves Smith 2011-10-11

Why are we in such a financial mess today? There are lots of proximate causes: over-leverage, global imbalances, bad financial technology that lead to widespread underestimation of risk. But these are all symptoms. Until we isolate and tackle fundamental causes, we will fail to extirpate the disease. *ECONned* is the first book to examine the unquestioned role of economists as policy-makers, and how they helped create an unmitigated economic disaster. Here, Yves Smith looks at how economists in key policy positions put

doctrine before hard evidence, ignoring the deteriorating conditions and rising dangers that eventually led them, and us, off the cliff and into financial meltdown. Intelligently written for the layman, Smith takes us on a terrifying investigation of the financial realm over the last twenty-five years of misrepresentations, naive interpretations of economic conditions, rationalizations of bad outcomes, and rejection of clear signs of growing instability. In *eConned*, author Yves Smith reveals: --why the measures taken by the Obama Administration are mere palliatives and are unlikely to pave the way for a solid recovery --how economists have come to play a profoundly anti-democratic role in policy --how financial models and concepts that were discredited more than thirty years ago are still widely used by banks, regulators, and investors --how management and employees of major financial firms looted them, enriching themselves and leaving the mess to taxpayers --how financial regulation enabled predatory behavior by Wall Street towards investors --how economics has no theory of financial systems, yet economists fearlessly prescribe how to manage them

Vintage cameras that had previously lost their value are now often worth more than they first sold for due to high demand amongst enthusiasts, students, and collectors. Film manufacturers have even started reissuing long discontinued stocks—for example, Kodak's much-loved and recently re-released classic Ektachrome slide film. In our modern world, billions of people have access to instantaneous photography on their mobile phones, but as a result there has been a resurgent desire for a more tactile, physical, unaltered, and thus honest medium. Much of which, ironically, ends up on the internet, with photography fans and influencers sharing their images across Instagram, Flickr, YouTube, and the like. More so than with digital photography, film photography requires a sense of craft, skill, patience, technical knowledge, and a trial-and-error process that results in a greater sense of accomplishment. *Old School Photography* is both enlightening and humorous, and attracts a new generation of fans who are eager to experiment with film cameras, make prints, and post their film photographs online.

Raised by a pro-black, Pan-African single mother during the crack years of 1980s Washington, DC, and educated at Sidwell Friends School and Harvard University, Baratunde Thurston has over thirty years' experience being black. Now, through stories of his politically inspired Nigerian name, the heroics of his hippie mother, the murder of his drug-abusing father, and other revelatory black details, he shares with readers of all colors his wisdom and expertise in how to be black. Beyond memoir, this guidebook offers practical advice on everything from "How to Be The Black Friend" to "How to Be The (Next) Black President" to "How to Celebrate Black History Month." To provide additional perspective, Baratunde assembled an award-winning Black Panel—three black women, three black men, and one white man (Christian Lander of Stuff White People Like)—and asked them such revealing questions as: "When Did You First Realize You Were Black?" "How Black Are You?" "Can You Swim?" The result is a humorous, intelligent, and audacious guide that challenges and satirizes the so-called experts, purists, and racists who purport to speak for all black people. With honest storytelling and biting wit, Baratunde plots a path not just to blackness, but one open to anyone interested in simply "how to be." Please note that due to the large file size of these special features this enhanced e-book may take longer to download than a standard e-book.

A revolutionary new system for generating the next big marketing ideas and opportunities According to Philip Kotler, the widely acknowledged "father" of modern marketing, and Fernando Trias de Bes the marketing techniques pioneered in the 1960s and '70s have worked too well. Fierce competition among products with little or nothing to distinguish one from another, along with modern product positioning and targeted marketing techniques, have led to increasing market segmentation. If the trend continues, individual market segments soon will be too small to be profitable. In *Lateral Marketing*, Kotler and Trias de Bes unveil a revolutionary new model to help readers expand beyond vertical segmentation and generate fresh marketing ideas and opportunities. Philip Kotler (Chicago, IL) is the S. C. Johnson & Son Distinguished Professor of International Marketing at Northwestern University's Kellogg School of Management. Fernando Trias de Bes (Barcelona, Spain) is the founder of Salvetti & Lombart whose clients include Pepsico, Sony, Hewlett-Packard, Nestlé, Credit Suisse, and other top corporations.

Let them Eat Tweets: How the Right Rules in an Age of Extreme Inequality - Jacob S. Hacker 2020-07-07

A New York Times Editors' Choice An "essential" (Jane Mayer) account of the dangerous marriage of plutocratic economic priorities and right-wing populist appeals — and how it threatens the pillars of American democracy. In Let Them Eat Tweets, best-selling political scientists Jacob S. Hacker and Paul Pierson argue that despite the rhetoric of Donald Trump, Josh Hawley, and other right-wing "populists," the Republican Party came to serve its plutocratic masters to a degree without precedent in modern global history. To maintain power while serving the 0.1 percent, the GOP has relied on increasingly incendiary racial and cultural appeals to its almost entirely white base. Calling this dangerous hybrid "plutocratic populism," Hacker and Pierson show how, over the last forty years, reactionary plutocrats and right-wing populists have become the two faces of a party that now actively undermines democracy to achieve its goals against the will of the majority of Americans. Based on decades of research and featuring a new epilogue about the intensification of GOP radicalism after the 2020 election, Let Them Eat Tweets authoritatively explains the doom loop of tax cutting and fearmongering that defines the Republican Party—and reveals how the rest of us can fight back.

Winning At Innovation - Fernando Trías de Bes 2015-02-11

Innovate or Die! Companies that cannot innovate and develop new products, strategies and technologies to keep ahead in today's fast paced market will not succeed. Winning at Innovation presents a ground breaking new model for successful marketing advancement from two world-leading experts in marketing

and innovation, Fernando Trías de Bes and Philip Kotler. Innovation is a responsibility normally assigned to R&D departments but this is not enough. Companies need a systematic framework so innovation can occur at any level of the organization. The A-F Model is a step-by-step process for developing a successful culture of innovation, bringing together the different individuals and groups across the organization for ideas to be created, developed and implemented. Offering flexibility, the model allows a back and forth flow of ideas and creativity to adapt to changing circumstances. Using this model, companies can learn how to make their innovation processes more effective, more sustainable, and more successful. Innovation must be a priority for organizations who want to be ready to grow and develop in post-recession economies. Trías de Bes and Kotler present a unique model for innovation for all companies that want to succeed in the global field.

The Department of Sensitive Crimes - Alexander McCall Smith 2019-04-16

In the Swedish criminal justice system, certain cases are considered especially strange and difficult, in Malmö, the dedicated detectives who investigate these crimes are members of an elite squad known as the Sensitive Crimes Division. These are their stories. The first case: the small matter of a man stabbed in the back of the knee. Who would perpetrate such a crime and why? Next: a young woman's imaginary boyfriend goes missing. But how on earth do you search for someone who doesn't exist? And in the final investigation: eerie secrets that are revealed under a full moon may not seem so supernatural in the light of day. No case is too unusual, too complicated, or too, well insignificant for this squad to solve. The team: Ulf "the Wolf" Varg, the top dog, thoughtful and diligent; Anna Bengsdotter, who's in love with Varg's car (and possibly Varg too); Carl Holgersson, who likes nothing more than filling out paperwork; and Erik Nykvist, who is deeply committed to fly fishing. With the help of a rather verbose local police officer, this crack team gets to the bottom of cases other detectives can't or won't bother to handle. Equal parts hilarious and heartening, The Department of Sensitive Crimes is a tour de farce from a true master.
