Communism for Kids - Bini Adamczak 2017-03-24

Communism, capitalism, work, crisis, and the market, described in simple storybook terms and illustrated by drawings of adorable little revolutionaries. Once upon a time, people yearned to be free of the misery of capitalism. How could their dreams come true? This little book proposes a different kind of communism, one that is true to its ideals and free from authoritarianism. Offering relief for many who have been numbed by Marxist exegesis and given headaches by the earnest pompousness of socialist politics, it presents political theory in the simple terms of a children's story, accompanied by illustrations of lovable little revolutionaries experiencing their political awakening. It all unfolds like a story, with jealous princesses, fancy swords, displaced peasants, mean bosses, and tired workers—not to mention a Ouija board, a talking chair, and a big pot called “the state.” Before they know it, readers are learning about the economic history of feudalism, class struggles in capitalism, different ideas of communism, and more. Finally, competition between two factories leads to a crisis that the workers attempt to solve in six different ways (most of them borrowed from historic models of communist or socialist change). Each attempt fails, since true communism is not so easy after all. But it's also not that hard. At last, the people take everything into their own hands and decide for themselves how to continue. Happy ending? Only the future will tell. With an epilogue that goes deeper into the theoretical issues behind the story, this book is perfect for all ages and all who desire a better world.

Personality and Assessment - Walter Mischel 2016-07-22

After many "out-of-print" years, this volume has been reissued in response to an increasing demand for copies. This reflects that the fundamental questions that motivated this book thirty years ago are still being asked. But more important, the answers -- or at least their outlines -- now seem to be in sight. In 1968, this book stood as an expression of a paradigm crisis in its critique of the state of personality psychology. The last three decades have been filled with controversy and debate about the dilemmas raised here, and then with renewal and fresh discoveries. It therefore seems especially timely to revisit the pages which posed the challenges. Mischel outlined the need to encompass the situation in the study of personality, but with a focus on the acquired meaning of stimuli and on the situation as perceived, viewing the individual as a cognitive-affective being who construes, interprets, and transforms the stimulus in a dynamic reciprocal interaction with the social world. He focused on the idiographic analysis of personality that had originally motivated the field, and the complexity, discriminative facility, and uniqueness of the individual, and sought to connect the expressions of personality to the individual's behavior -- that is, to what people do and not just what they say. Even the intrinsically contextualized "if...then..." expressions of the personality system -- its essential behavioral signatures -- were foreshadowed in this book that fired the opening salvo in a search for "a truly dynamic personality psychology."

Interviewer Approaches - Jean Morton-Williams 1993-01-01

The Maghrib in Question - Michel Le Gall 2010-07-05

A wealth of historical writing dealing with the Maghrib (Morocco, Algeria, Tunisia, and Libya) has been published during the roughly forty years since European colonial control ended in the region. This book provides a "state of the field" survey of this postcolonial Maghribi historiography. The book contains thirteen essays by leading Maghribi and North American scholars. The first section surveys the Maghrib as a whole; the second focuses on individual countries of the Maghrib; and the third explores theoretical issues and case studies. Cutting across chronological categories, the book encompasses historiographical writing dealing with all eras, from the ancient Maghrib to the contemporary period.

The Brain and the Inner World - Mark Solms 2018-04-24

This work is an eagerly awaited account of this momentous and ongoing revolution, elaborated for the general reader by two pioneers of the field. The book takes the nonspecialist reader on a guided tour through the exciting new discoveries, pointing out along the way how old psychodynamic concepts are being forged into a new scientific framework for understanding subjective experience - in health and disease.

Doing Good Better - William MacAskill 2015-07-28

Most of us want to make a difference. We donate our time and money to charities and causes we deem worthy, choose careers we consider meaningful, and patronize businesses and buy products we believe make the world a better place. Unfortunately, we often base these decisions on assumptions and emotions rather than facts. As a result, even our best intentions often lead to ineffective—and sometimes downright harmful—outcomes. How can we do better? While a researcher at Oxford, trying to figure out which career would allow him to have the greatest impact, William MacAskill confronted this problem head on. He discovered that much of the potential for change was being squandered by lack of information, bad data, and our own prejudice. As an antidote, he and his colleagues developed effective altruism, a practical, data-driven approach that allows each of us to make a tremendous difference regardless of our resources. Effective altruists believe that it's not enough to simply do good; we must do good better. At the core of this philosophy are five key questions that help guide our altruistic decisions: How many people benefit, and by how much? Is this the most effective thing I can do? Is this area neglected? What would have happened otherwise? What are the chances of success, and how good would success be? By applying these questions to real-life scenarios, MacAskill shows how many of our assumptions about doing good are misguided. For instance, he argues one can potentially save more lives by becoming a plastic surgeon rather than a heart surgeon; measuring overhead costs is an inaccurate gauge of a charity's effectiveness; and, it generally doesn't make sense for individuals to donate to disaster relief. MacAskill urges us to think differently, set aside biases, and use evidence and careful reasoning rather than act on impulse. When we do this—when we apply the head and the heart to each of our altruistic endeavors—we find that each of us has the power to do an astonishing amount of good.

From Parents to Children - John Ermisch 2012-05-01

Does economic inequality in one generation lead to inequality of opportunity in the next? In *From Parents to Children*, an esteemed international group of scholars investigates this question using data from ten countries with differing levels of inequality. The book compares whether and how parents' resources transmit advantage to their children at different stages of development and sheds light on the structural differences among countries that may influence intergenerational mobility. How and why is economic mobility higher in some countries than in others? The contributors find that inequality in mobility-relevant skills emerges early in childhood in all of the countries studied. Bruce Bradbury and his coauthors focus on learning readiness among young children and show that as early as age five, large disparities in cognitive and other mobility-relevant skills develop between low- and high-income kids, particularly in the United States and the United Kingdom. Such disparities may be mitigated by investments in early childhood education, as Christelle Dumas and Arnaud Lefranc demonstrate. They find that universal pre-school education in France lessens the negative effect of low parental SES and gives low-income children a greater shot at social mobility. Katherine Magnuson, Jane Waldfogel, and Elizabeth Washbrook find that income-based gaps in cognitive achievement in the United States and the United Kingdom widen as children reach adolescence. Robert Haveman and his coauthors show that the effect of parental income on test scores increases as children age; and in both the United States and Canada, having parents with a higher income betters

the chances that a child will enroll in college. As economic inequality in the United States continues to rise, the national policy conversation will not only need to address the devastating effects of rising inequality in this generation but also the potential consequences of the decline in mobility from one generation to the next. Drawing on unparalleled international datasets, *From Parents to Children* provides an important first step.

Politics of Catastrophe - Claudia Aradau 2011-05-02

This book argues that catastrophe is a particular way of governing future events – such as terrorism, climate change or pandemics – which we cannot predict but which may strike suddenly, without warning, and cause irreversible damage. At a time where catastrophe increasingly functions as a signifier of our future, imaginaries of pending doom have fostered new modes of anticipatory knowledge and redeployed existing ones. Although it shares many similarities with crises, disasters, risks and other disruptive incidents, this book claims that catastrophes also bring out the very limits of knowledge and management. The politics of catastrophe is turned towards an unknown future, which must be imagined and inhabited in order to be made palpable, knowable and actionable. *Politics of Catastrophe* critically assesses the effects of these new practices of knowing and governing catastrophes to come and challenges the reader to think about the possibility of an alternative politics of catastrophe. This book will be of interest to students of critical security studies, risk theory, political theory and International Relations in general.

The Limits of Community - Helmuth Plessner 1999

Plessner (1892-1985), a onetime student of Husserl and contemporary of Heidegger, achieved recognition as a German social philosopher who helped establish philosophical anthropology as a discipline in the post-World War II decades. Anticipating the rise of German fascism in *The Limits of Community* (1924), he presents the appeal and dangers of rejecting modern society for the sake of a political ideal-based community. Translator Wallace (philosophy, Sonoma State U., California) provides a balanced introduction to Plessner's Max Weber-influenced ideas. The volume lacks an index. What Objects Mean - Arthur Asa Berger 2016-06-16

Arthur Asa Berger, author of an array of texts in communication, popular culture, and social theory, is back with the second edition of his popular,

user-friendly guide for students who want to understand the social meanings of objects. In this broadly interdisciplinary text, Berger takes the reader through half a dozen theoretical models that are commonly used to analyze objects. He then describes and analyzes eleven objects, many of them new to this edition—including smartphones, Facebook, hair dye, and the American flag—showing how they demonstrate concepts like globalization, identity, and nationalism. The book includes a series of exercises that allow students to analyze objects in their own environment. Brief and inexpensive, this introductory guide will be used in courses ranging from anthropology to art history, pop culture to psychology.

Österreichische Geschichte - Herwig Wolfram 1994

Bertha Von Suttner - Brigitte Hamann 1996

Austrian writer and peace activist Bertha von Suttner was the first woman to win the Nobel Peace Prize. As founder of the Austrian and German Peace Associations and the author of a number of novels and several works on peace, von Suttner's name became synonymous worldwide with peace activism and protest against old world order. Ironically, her death eight days before the outbreak of World War I was seen by her contemporaries as a symbolic end of the possibility for world peace. In *Bertha von Suttner*, Brigitte Hamann has written the most comprehensive biography of the celebrated journalist - translated into English by Ann Dubskey - tracing not only von Suttner's life and work but spanning the political and social frontier of Austria on the eve of World War I. Von Suttner's novel *Die Waffen Nieder!* (*Lay Down Your Arms!*), published in 1899, was a bestseller and brought her international acclaim. Indeed, Tolstoy compared her technique of rallying readers to her cause to that of Harriet Beecher Stowe in *Uncle Tom's Cabin* for the emancipation of American slaves. Her lectures on peace and disarmament took her throughout Europe and the United States, where she formed close friendships with Andrew Carnegie, Alfred Nobel, Theodor Herzl, and Albert I of Monaco. As her conviction to initiate peace movements deepened, so her books became more impassioned. Her dictum, "universal sisterhood is necessary before the universal brotherhood is possible", demonstrated that her concerns extended beyond the peace movement to include women's issues and many social causes, making von Suttner's work quite relevant at the close of the twentieth century.

Geschichte der französischen Litteratur von ihren Anfängen bis auf die neueste Zeit - Eduard Engel 1897

"Neider Überall Zwingen Uns Zu Gerechter Verteidigung" - Andreas Dorrer 2021

This first monograph on WWI dramatic literature closes one of the last research desiderata of the German literature on the First World War. The author opens up a hitherto unknown corpus of texts and identifies the most important discourses represented in these WWI plays. Furthermore, he embeds the discourses in contemporary public debates and identifies them in more famous dramatic works of the Weimar Republic. This allows the analysis of the Heimkehrerdramen of Toller, Brecht, and Horváth to focus on the representation of contemporary narratives that have so far been overlooked and embeds these plays in the context in which they were created. Previously, this was only the case for Karl Kraus's *Die letzten Tage der Menschheit*, which is also interpreted by the author in a newly established intertextual relationship with early WWI dramas. The approach this book takes not only provides new insights into WWI dramatic literature from 1914 to the end of the Weimar Republic, but also new points of departure for research in a number of literary and cultural studies fields. *Die Arbeit* wurde von der Universität Jena und dem Weimarer Republik e.V. mit dem Friedrich-Ebert-Preis 2021 für die internationale beste Dissertation/Habilitation zur Weimarer Republik ausgezeichnet.

Expatriate Managers - Anna Spiegel 2017-10-18

Since the 1990s, economic and cultural globalization has propelled the transnational mobility of managers and fueled cross-border careers. Some scholars have argued for the emergence of a new global business elite with cosmopolitan mind-sets and homogeneous lifestyles, while others have highlighted their disconnection from the local surroundings and their everyday life within national expatriate 'bubbles'. Thus, the question of whether today's mobile professionals can be described as interculturally open and competent cosmopolitans, or as pronounced anti-cosmopolitans, is still unanswered. *Expatriate Managers and the Paradoxes of Working and Living Abroad* considers a core protagonist of economic globalization and the management of MNCs through the lens

of a practice-based theoretical approach whilst seeking to address this question by building on intensive ethnographic case studies of expatriate managers, most of them high-ranking executives, from two comparative different home countries, the US and Germany. These managers, together with their families, have been assigned to China, Germany, or the US to perform demanding coordination tasks within their multinational corporations (MNCs). Based on detailed accounts of expatriate managers' experiences and everyday practices, the book reveals the multiple and sometimes paradoxical ways in which they deal with cultural differences as they build up new forms of working, belonging and dwelling. The findings suggest that the newly emerging mind-sets and lifestyles of expatriate managers transcend the polarized images of mobile elites as either cosmopolitan 'global managers' or parochial anti-cosmopolitans. *Expatriate Managers and the Paradoxes of Working and Living Abroad* examines the global elite from an everyday perspective, showing that understanding the dynamics of a global economy requires probing into the lifeworld's agency and everyday arrangements of the social actors who are putting globalization into practice.

Orientalism and the Postcolonial Predicament - Carol A. Breckenridge 1993

This book explores the ways in which colonial administrators constructed knowledge about the society and culture of India and the processes through which that knowledge has shaped past and present Indian reality.

Portraying the Prince in the Renaissance - Patrick Baker 2016-06-20

The portrayal of princes plays a central role in the historical literature of the European Renaissance. The sixteen contributions collected in this volume examine such portrayals in a broad variety of historiographical, biographical, and poetic texts. It emerges clearly that historical portrayals were not essentially bound by generic constraints but instead took the form of *res gestae* or *historiae*, discrete or collective biographies, panegyric, mirrors for princes, epic poetry, orations, even commonplace books - whatever the occasion called for. Beyond questions of genre, the chapters focus on narrative strategies and the transformation of ancient, medieval, and contemporary authors, as well as on the influence of political, cultural, intellectual, and social contexts. Four broad thematic foci inform the structure of this book: the virtues ascribed to the prince, the cultural and political pretensions inscribed in literary portraits, the historical and literary models on which these portraits were based, and the method that underlay them. The volume is rounded out by a critical summary that considers the portrayal of princes in humanist historiography from the point of view of transformation theory.

Turnout in Germany - Markus Steinbrecher 2007

Turnout in Germany has been declining since the end of the 1980s. European and Landtag elections are particularly affected by this development. The all-time low was a turnout of 43 percent in the European Parliament election in 2004. The causes for this dramatic decline are a regular topic in public debates. This book analyses the participation of Germans in European, Bundestag and Landtag elections since 1979. With its broad research design it integrates the most important approaches of empirical electoral research. In the first part, turnout is described within its geographic and social context by means of data from official statistics. However, individual attitudes and motives of the voters are even more important for the interpretation of declining turnout and hence are dealt with in the second part of the book. The weakening of social norms and political dissatisfaction have dramatic consequences for turnout. In addition, Europe-, Federal- and Lander-specific factors cannot be neglected in a system of multi-level governance.

Along the Archival Grain - Ann Laura Stoler 2010-01-25

Along the Archival Grain offers a unique methodological and analytic opening to the affective registers of imperial governance and the political content of archival forms. In a series of nuanced mediations on the nature of colonial documents from the nineteenth-century Netherlands Indies, Ann Laura Stoler identifies the social epistemologies that guided perception and practice, revealing the problematic racial ontologies of that confused epistemic space. Navigating familiar and extraordinary paths through the lettered lives of those who ruled, she seizes on moments when common sense failed and prevailing categories no longer

seemed to work. She asks not what colonial agents knew, but what happened when what they thought they knew they found they did not. Rejecting the notion that archival labor be approached as an extractive enterprise, Stoler sets her sights on archival production as a consequential act of governance, as a field of force with violent effect, and not least as a vivid space to do ethnography.

Scientific Research in Education - National Research Council 2002-03-28

Researchers, historians, and philosophers of science have debated the nature of scientific research in education for more than 100 years. Recent enthusiasm for "evidence-based" policy and practice in education—now codified in the federal law that authorizes the bulk of elementary and secondary education programs—have brought a new sense of urgency to understanding the ways in which the basic tenets of science manifest in the study of teaching, learning, and schooling. *Scientific Research in Education* describes the similarities and differences between scientific inquiry in education and scientific inquiry in other fields and disciplines and provides a number of examples to illustrate these ideas. Its main argument is that all scientific endeavors share a common set of principles, and that each field—including education research—develops a specialization that accounts for the particulars of what is being studied. The book also provides suggestions for how the federal government can best support high-quality scientific research in education.

Behavioral Expressions and Biosocial Bases of Sensation Seeking - Marvin Zuckerman 1994-06-24

This book is about a trait describing variations in the universal need for novel and intense stimulation and its expressions in various risky kinds of behaviour (including driving habits, health, gambling, financial risk, alcohol and drug use and abuse, sexual behaviour, and sports). Sensation seeking is also important in preferences for various vocations, media forms and content, food, humour and social attitudes. Compatibility in the trait influences premarital and marital relationship satisfaction. Its modes of assessment, behavioural expressions, and genetic and psychobiological bases are described by one of the leading researchers in this field. This book presents the only available study of this fascinating topic and it will be sure to interest researchers and their students active in personality research.

The Hunt for the Last Respondent - Ineke A. L. Stoop 2005

Non-response in sample surveys can have serious consequences on the accuracy of survey results. This study shows how high response rates can be achieved, even in the Netherlands, a country notorious for its low response rates. As an introduction, an overview of groups that generally have low response rates and the possible causes of their lack of response is presented. The emphasis is on non-response bias that occurs when non-response behavior and survey outcomes are correlated, independent of background characteristics. *The Hunt for the Last Respondent* will be of interest to survey methodologists, market researchers, survey sponsors, and survey statisticians, as well as anyone interested in survey quality.

Writing the Great War - Christoph Cornelissen 2020-11-01

From the Treaty of Versailles to the 2018 centenary and beyond, the history of the First World War has been continually written and rewritten, studied and contested, producing a rich historiography shaped by the social and cultural circumstances of its creation. *Writing the Great War* provides a groundbreaking survey of this vast body of work, assembling contributions on a variety of national and regional historiographies from some of the most prominent scholars in the field. By analyzing perceptions of the war in contexts ranging from Nazi Germany to India's struggle for independence, this is an illuminating collective study of the complex interplay of memory and history.

Reflexive Modernization - Ulrich Beck 1994

Three prominent social thinkers discuss how modern society is undercutting its formations of class, stratum, occupations, sex roles, the nuclear family, and more. Reflexive modernization, or the way one kind of modernization undercuts and changes another, has wide ranging implications for contemporary social and cultural theory, as this provocative book demonstrates.

Jewish Encounters with Buddhism in German Culture - Sebastian Musch 2019-10-10

In Germany at the turn of the century, Buddhism transformed from an obscure topic, of interest to only a few misfit scholars, into a cultural phenomenon. Many of the foremost authors of the period were profoundly influenced by this rapid rise of Buddhism—among them, some of the best-known names in the German-Jewish canon. Sebastian Musch

excavates this neglected dimension of German-Jewish identity, drawing on philosophical treatises, novels, essays, diaries, and letters to trace the history of Jewish-Buddhist encounters up to the start of the Second World War. Franz Rosenzweig, Martin Buber, Leo Baeck, Theodor Lessing, Jakob Wassermann, Walter Hasenclever, and Lion Feuchtwanger are featured alongside other, lesser known figures like Paul Cohen-Portheim and Walter Tausk. As Musch shows, when these thinkers wrote about Buddhism, they were also negotiating their own Jewishness.

Intervention Research in Educational Practice - Hermann Astleitner 2020
Improving learning and teaching at schools or universities may start with choosing evidence-based interventions and practices, but does not end there. To ensure sustainable changes to programs in educational practice, interventions need to address complex issues related to theories, research designs, and measurements. This book presents typical but often overlooked problems in intervention research in educational practice. These problems are embedded in various educational areas such as, amongst others, school effectiveness, instructional design or motivational aspects of teacher trainings.

Woodrow Wilson and Colonel House: A Personality Study - Alexander L. George 2019-08-15

Woodrow Wilson's presidential campaign in 1912 marked the beginning of a remarkable personal and political collaboration between Wilson and Colonel Edward M. House. The book traces the complexities of Wilson's life and career along with his relationship with House, who for almost a decade was his closest behind-the-scenes advisor and confidant. Through the early years of Wilson's boyhood, his rise to prominence in the academic world, to the presidency of Princeton University and the governorship of New Jersey, the authors analyze the forces and events that shaped Wilson's character and his actions in the political arena: Wilson's first administration, his struggles with Congress, American participation in World War I, the Paris Peace Conference, the formation of the League of Nations, the battle with the Senate over the Versailles Peace Treaty, Wilson's appeal to the nation, and the eventual collapse of his health and his great dream. "Probably tomorrow's biographies will continue the present tendency toward raiding the social sciences for new research techniques... The fascinating dual biography of Woodrow Wilson and Colonel House by Alexander and Juliette George shows what can and will be done in this field." John Garraty, *The New York Times* "The first completely satisfactory account of this strange relationship... excellent and beautifully written." — Bernard Brodie, *World Politics* "Fascinating as a study in human relations, important because of the destiny the two men held in their hands." — *Saturday Review* "It has never before been told so well... Highly recommended." — *Newsday* "Woodrow Wilson and Colonel House: A Personality Study may be counted among the classics in political psychology... it helped to establish a new methodological standard for psychobiography, signaling a significant step in the discipline's maturation. Additionally, the Georges' account has become a resource for a number of scholars, particularly political scientists, interested in a psychological perspective on Wilson or on the presidency itself... Woodrow Wilson and Colonel House has remained over the years a vital part of a number of continuing, substantive scholarly debates on Wilson and on the psychobiographical endeavor generally." — William Friedman, *Political Psychology* "[A]n interesting and suggestive biography... two historians have nicely drawn upon psychoanalytic principles without in any way doing an injustice to their own responsibilities" — Robert Coles, *The New York Review of Books* "It is one of the best attributes of this well-written and interesting volume that the authors have managed to set down, as no one has done so well before, the way in which Colonel House coolly took the measure of Wilson's personality and undertook to ingratiate himself... [T]he authors are thoroughly aware of the vagaries of human nature. The impression throughout the book is one of careful analysis and insight... There is a refreshing unwillingness, on the part of the authors, to bury their narrative in detail, and hence the high points of Wilson's career come out clearly, and the judgments are likewise sharp and pointed... All in all, a first-rate volume of history." — Robert H. Ferrell, *The Review of Politics* "The authors have done their research thoroughly, have presented their arguments convincingly, and have drawn logical conclusions... [They] are to be congratulated upon a job well done." — George C. Osborn, *The Annals of the American Academy of Political and Social Science* "The study is well documented and carefully written. It should have enduring value." — Rupert N. Richardson, *The Southwestern Historical Quarterly* "The authors have made a valuable contribution to the literature on Woodrow Wilson and opened new possibilities in

historical study." — J. Chal Vinson, *The Georgia Historical Quarterly* "A commendable little book which should take high place among the one-volume biographies of Woodrow Wilson. It is a well-balanced, smartly-paced work, maturely organized and presented in an engaging... manner. For the general reader interested in good biography well told, the book should have a special and richly deserved appeal." — Charles Jellison, *The American Historical Review*
Family Man - Scott Coltrane 1997

More important, Coltrane suggests that as fathers participate more fully in raising their children and performing traditionally female household tasks, men will themselves be transformed by the experience in profoundly positive ways and American society as a whole will move closer to true gender equity.

Price Management - Hermann Simon 2018-12-11

In this book, the world's foremost experts on pricing integrate theoretical rigor and practical application to present a comprehensive resource that covers all areas of the field. This volume brings together quantitative and qualitative approaches and highlights the most current innovations in theory and practice. Going beyond the traditional constraints of "price theory" and "price policy," the authors coined the term "price management" to represent a holistic approach to pricing strategy and tactical implementation. They remind us that the Ancient Romans used one word, pretium, to mean both price and value. This is the fundamental philosophy that drives successful price management where producer and customer meet. Featuring dozens of examples and case studies drawn from their extensive research, consulting, and teaching around the world, Simon and Fassnacht cover all aspects of pricing following the price management process with its four phases: strategy, analysis, decision, and implementation. Thereby, the authors take into account the nuances across industry sectors, including consumer goods, industrial products, services, and trade/distribution. In particular, they address the implications of technological advancements, such as the Internet and new measurement and sensor technologies that have led to a wealth of price management innovations, such as flat rates, freemium, pay-per-use, or pay-what-you-want. They also address the emergence of new price metrics, Big Data applications, two-sided price systems, negative prices, and the sharing economy, as well as emerging payment systems such as bitcoin. The result is a "bible" for leaders who recognize that price is not only a means to drive profit in the short term, but a tool to generate sustained growth in shareholder value over the longer term, and a primer for researchers, instructors, and students alike. Praise for Price Management "This book is truly state of the art and the most comprehensive work in price management." - Prof. Philip Kotler, Kellogg School of Management, Northwestern University "This very important book builds an outstanding bridge between science and practice." - Kasper Rorsted, CEO, Adidas "This book provides practical guidelines on value creation, communication and management, which is an imperative for businesses to survive in the coming era of uncertainty." - Dr. Chang-Gyu Hwang, Chairman and CEO, KT Corporation (Korea Telecom)

Unlearning Eugenics - Dagmar Herzog 2018-11-20

Since the defeat of the Nazi Third Reich and the end of its horrific eugenics policies, battles over the politics of life, sex, and death have continued and evolved. Dagmar Herzog documents how reproductive rights and disability rights, both latecomers to the postwar human rights canon, came to be seen as competing--with unexpected consequences. Bringing together the latest findings in Holocaust studies, the history of religion, and the history of sexuality in postwar--and now also postcommunist--Europe, *Unlearning Eugenics* shows how central the controversies over sexuality, reproduction, and disability have been to broader processes of secularization and religious renewal. Herzog also restores to the historical record a revelatory array of activists: from Catholic and Protestant theologians who defended abortion rights in the 1960s-70s to historians in the 1980s-90s who uncovered the long-suppressed connections between the mass murder of the disabled and the Holocaust of European Jewry; from feminists involved in the militant "cripple movement" of the 1980s to lawyers working for right-wing NGOs in the 2000s; and from a handful of pioneers in the 1940s-60s committed to living in intentional community with individuals with cognitive disability to present-day disability self-advocates.

Poetics and Politics - Toni Bernhart 2018-08-21

Far from teleological historiography, the pan-European perspective on Early Modern drama offered in this volume provides answers to why, how, where and when the given phenomena of theatre appear in history. Using theories of circulation and other concepts of exchange, transfer

and movement, the authors analyze the development and differentiation of European secular and religious drama, within the disciplinary framework of comparative literature and the history of literature and concepts. Within this frame, aspects of major interest are the relationship between tradition and innovation, the status of genre, the proportion of autonomous and heteronomous creational dispositions within the artefacts or genres they belong to, as well as strategies of functionalization in the context of a given part of the cultural net. Contributions cover a broad range of topics, including poetics of Early Modern Drama; political, institutional and social practices; history of

themes and motifs (Stoffgeschichte); history of genres/cross-fertilization between genres; textual traditions and distribution of texts; questions of originality and authorship; theories of circulation and net structures in Drama Studies.
