Kenya, Uganda and Zanzibar - Great Britain. Foreign Office. Historical Section 1920 In preparation for the peace conference that was expected to follow World War I, in the spring of 1917 the British Foreign Office established a special section responsible for preparing background information for use by British delegates to the conference. Kenya, Uganda, and Zanzibar is Number 96 in a series of more than 160 studies produced by the section, most of which were published after the conclusion of the 1919 Paris Peace Conference. As explained in an editorial note, in 1920 the British East Africa Protectorate became a colony and its name was changed to Kenya. Unlike the cover and the title page, the text was not updated and still refers to the protectorate. The book contains sections on physical and political geography, political history, social and political conditions, and economic conditions. The historical discussion covers the 19th-century rivalry between Great Britain and Germany for control of territories in East Africa claimed by the sultan of Zanzibar. The Anglo-German agreement of 1886 left the sultan only the island of Zanzibar and a narrow strip of the mainland. The vast hinterland was divided

between British and German commercial interests and eventually became, in the south, German East Africa, and in the north, the East Africa Protectorate. In 1890, Zanzibar itself (part of present-day Tanzania) became a British protectorate, in exchange for which Germany acquired the North Sea island of Heligoland. The section on economic conditions discusses the prospects for economic development and profitable investment in Kenya and Uganda, focusing on three factors: useful products, which it concluded existed "in abundance;" labor, which it concluded existed "in bare sufficiency;" and transport facilities, said to be "inadequate for progress." The appendix includes tables of economic statistics and extracts from the Anglo-German agreements relating to these territories.

Microsoft Project 2000 For Dummies - Martin Doucette 2000-04-03
Why put yourself through all the trouble of figuring out a project management software program? And why find out about project management techniques when you've been muddling through on your own up until now? The answer is self-evident. Because you've managed projects before and you know there has to be a better way. You're ready to discover what all this project management hoopla is about, and you'd like to use Microsoft Project to do the job. You've just made two good management decisions right there. Deep down, you're probably wondering whether this is going to hurt. You'll be relieved to know that getting to know Microsoft Project is straightforward and kind of fun. You don't have to know anything special about computers or project management to begin. Of course, once you start throwing those Gantt charts around the office, people might assume that it took grueling labor and a steel will to figure out the program. Whether you choose to display modesty or bask in their amazement will be

entirely up to you. As this book's title so subtly implies, it will show you how to use Microsoft Project 2000. But what the title doesn't say is that this book also gives you a basic explanation of project management. You'll cover all of the following topics, and more: Identifying project phases Getting comfortable with the Microsoft Project interface Predicting your resource needs Reading and creating Gantt charts Staying ahead of details with a calendar Setting budgets and reviewing costs Subdividing and combining projects Tracking your project Using and customizing reports Microsoft Project 2000 For Dummies is written in a way that lets you master your project management skills by practice. The enclosed CD-ROM is loaded with a number of project files so that you can read the material and practice. In addition, you'll get evaluation and demo copies of some excellent project management programs designed to make your job even easier.

Projects in the Computing Curriculum - Michael Holcombe 2012-12-06 Dr Peter Milton, Director of Programme Review, Quality Assurance Agency I am grateful to the authors for giving me the opportunity to write this foreword, mainly because it represents the first occasion that the Fund for the Development of Teaching and Learning (FDTL) has led directly to a pUblication such as this. In my former capacity as Director of Quality Assessment at the Higher Education Funding Council for England (HEFCE), I chaired the FDTL Committee during 1996/7 and am delighted to see the projects which were selected so painstakingly leading to successful outcomes. Assessment of the quality of higher education (HE) was introduced in 1993 and was intended to improve public information about what was on offer in British universities and colleges, as well as to assist in the enhancement of educational opportunities for students. This was part of a larger agenda in which educational quality and the standards achieved by students have come under increasing scrutiny, with a long-term objective of linking funding allocations to the quality of the provision. It was in this context that the FDTL Initiative was launched in 1995 to support projects aimed at stimulating developments in teaching and learning and to encourage the dissemination of good practice across the HE sector. Good practice is identified through the process of quality

assessment and bids for funding can only be made by those institutions which have demonstrated high quality provision. To date, the programme includes 63 projects drawn from 23 subject areas.
