Simulation in Healthcare

Education - Harry Owen

2016-03-05

Simulation in healthcare education has a long history, yet in many ways, we have been reinventing the wheel

during the last 25 years.

Historically, simulators have been much more than simple models, and we can still learn from aspects of simulation used hundreds of years ago. This book gives a narrative history

of the development of simulators from the early 1700s to the middle of the 20th century when simulation in healthcare appeared to all but die out. It is organized around the development of simulation in different countries and includes at the end a guide to simulators in museums and private collections throughout the world. The aim is to increase understanding of simulation in the professional education of healthcare providers by exploring the historical context of simulators that were developed in the past, what they looked like, how they were used, and examples of simulator use that led to significant harm and an erosion of standards. The book is addressed to the healthcare simulation community and historians of medicine. The latter in particular will appreciate the identification and use of historic sources written in Latin, German, Italian, French, Polish and Spanish as well as English.

Aristotle's Animals in the Middle Ages and Renaissance - Emeritus Professor for Ancient & Medieval Philosophy Carlos Steel 1999

Aristotle's zoological writings with their wealth of detailed investigations on diverse species of animals have fascinated medieval and Renaissance culture. This volume explores how these texts have been read in various traditions (Arabic, Hebrew, Latin), and how they have been incorporated in different genres (in philosophical and scientific treatises, in florilegia and encyclopedias, in theological symbolism, in moral allegories, and in manuscript illustrations). This multidisciplinary and multilinguistic approach highlights substantial aspects of Aristotle's animals.

The Exploited Child - Bernard Schlemmer 2000-07

This investigation of child labor

explores difficult conceptual and public policy issues. It demonstrates the sheer prevalence of the commercial exploitation of child labor in both industrial and developing countries, and its rapid growth today under the twin pressures of mass poverty and the globalized marketplace for labor. In addition to its rich empirical material from countries in Asia, Latin America, Africa, and Europe, the author makes a clear distinction between the socialization of children through labor within the family and their economic exploitation for profit. It also focuses on the role of adults with responsibility for children, and the specific form which paternal domination takes towards children.

*The Chronicles of Narnia Vol III: The Voyage of the Dawn Treader* - C.S.Lewis 2016-08-12  
The Voyage of the Dawn Treader sees Edmund and Lucy, along with their priggish cousin Eustace Scrubb, return to Narnia. Once there, they join Caspian's voyage on the ship to

find the seven lords who were banished when Miraz took over the throne. As they sail toward Aslan's country at the edge of the world, they come face to face with many dangers and wonders, including the place where dreams come true. They discover that their quest is more than they imagined and that the world's end is only the beginning...

## **Narrative Exchanges**

**(Routledge Revivals)** - Ian

Reid 2014-08-13

First published in 1992, Narrative Exchanges shows how a general model of communicative exchanges can be refined to deal with the complexities of narrative fiction. Going beyond the two-way structure of reciprocity, it gives particular attention to the processes of framing, substitution and dispossession by which written texts generate meaning. The title provides an innovative way of combining narrative and exchange theory, bringing the two areas of thought into a mutually critical relationship. Using a wide variety of narrative texts, literary and non-literary, canonical and non-canonical, authors discussed include Flaubert, Achebe, Mansfield, Boccaccio, Duras, Daudet, Moorhouse, DeLillo and Wordsworth. Drawing on perspectives from anthropology, linguistics and education, and combining

accessible readings with theoretical debate, Ian Reid makes a significant contribution to the debate about narrative theory.

Dionysos in Classical Athens - Cornelia Isler-Kerényi 2014-11-14

Dionysos, with his following of satyrs and women, was a major theme in a big part of the figure painted pottery in 500-300 B.C. Athens. As an original testimonial of their time, the imagery on these vases convey what this god meant to his worshippers. It becomes clear that he was not only appropriate for wine, wine indulgence, ecstasy and theatre. Rather, he was present on many, both happy and sad, occasions. The vase painters have emphasized different aspects of Dionysos for their customers inside and outside of Athens, depending on the political and cultural situation.

**Global Gold Production Touching Ground** - Boris Verbrugge 2020-05-04

In recent decades, gold mining has moved into increasingly remote corners of the globe. Aside from the expansion of industrial gold mining, many countries have simultaneously witnessed an expansion of labor-intensive and predominantly informal artisanal and small-scale gold

mining. Both trends are usually studied in isolation, which contributes to a dominant image of a dual gold mining economy. Counteracting this dominant view, this volume adopts a global perspective, and demonstrates that both industrial gold mining and artisanal and small-scale gold mining are functionally integrated into a global gold production system. It couples an analysis of structural trends in global gold production (expansion, informalization, and technological innovation) to twelve country case studies that detail how global gold production becomes embedded in institutional and ecological structures.

**Belonging** - Nira Yuval-Davis

2006-06-27

This collection of essays examines the racialized and gendered effects of contemporary politics of belonging, issues which lie at the heart of contemporary political and social lives. It encompasses critical questions of identity and citizenship, inclusion and exclusion, emotional attachments, violent

conflicts and local/global relationships. The range - geographically, thematically and theoretically - covered by the chapters reflects current concerns in the world today. A timely contribution to the ongoing debates in the field, it will be a valuable companion to scholars working in the areas of multiculturalism, globalisation and culture, race and ethnic studies, gender studies and studies of post-partition societies.

**Corpus** - Jean-Luc Nancy

2009-08-25

How have we thought "the body"? How can we think it anew? The body of mortal creatures, the body politic, the body of letters and of laws, the "mystical body of Christ"—all these (and others) are incorporated in the word Corpus, the title and topic of Jean-Luc Nancy's masterwork. Corpus is a work of literary force at once phenomenological, sociological, theological, and philosophical in its multiple orientations and approaches. In thirty-six brief sections, Nancy offers us at

once an encyclopedia and a polemical program—reviewing classical takes on the “corpus” from Plato, Aristotle, and Saint Paul to Descartes, Hegel, Husserl, and Freud, while demonstrating that the mutations (technological, biological, and political) of our own culture have given rise to the need for a new understanding of the body. He not only tells the story of this cultural change but also explores the promise and responsibilities that such a new understanding entails. The long-awaited English translation is a bold, bravura rendering. To the title essay are added five closely related recent pieces—including a commentary by Antonia Birnbaum—dedicated in large part to the legacy of the “mind-body problem” formulated by Descartes and the challenge it poses to rethinking the ancient problems of the corpus. The last and most poignant of these essays is “The Intruder,” Nancy’s philosophical meditation on his heart transplant. The book also

serves as the opening move in Nancy’s larger project called “The deconstruction of Christianity.”

*Wine and Vine Components and Health* - Norbert Latruffe 2019-07-26

While there is a tremendous literature on the topic of wine and health ranging back to the days of Hippocrates, it is considered that there is an unlimited variety of wine, allowing for the association of senses, nutrition, and hedonism. The history of vine and wine has lasted for at least 7000 years. Vitis represent adaptable plants, and thanks to the large variety of strains, wine is an alchemical mix with unique properties, a rich and original composition in terms of polyphenols, and well known antioxidants. This explains why wine and health are closely linked to nutrition.

Blood is Thicker Than Water - Alistair J. Bright 2011

This study represents a

contribution to the pre-Colonial archaeology of the Windward Islands in the Caribbean. The research aimed to determine how the Ceramic Age (c. 400 BC - AD 1492) Amerindian inhabitants of the region related to one another and others at various geographic scales, with a view to better understanding social interaction and organisation within the Windward Islands as well the integration of this region within the macro-region. This research approached the study of intra- and inter-island interaction and social development through an island-by-island study of some 640 archaeological sites and their ceramic assemblages. Besides providing insight into settlement sequences, patterns and micro-mobility through time, it also highlighted various configurations of sites spread across different islands that were united by shared ceramic (decorative) traits. These configurations were more closely examined by taking recourse to graph-theory. By extending the comparative

scope of this research to the Greater Antilles and the South American mainland, possible material cultural influences from more distant regions could be suggested. While Windward Island communities certainly developed a localised material cultural identity, they remained open to a host of wide-ranging influences outside the Windward Island micro-region. As such, rather than representing a cultural backwater operating in the periphery of a burgeoning Taíno empire, it is argued that Windward Island communities actively and flexibly realigned themselves with several mainland South American societies in Late Ceramic Age times (c. AD 700-1500), forging and maintaining significant ties and exchange relationships. Alistair Bright was a member of the Caribbean Research Group at Leiden University from 2003 to 2010 and participated in numerous archaeological surveys and excavations in the Caribbean during that time. His research interests include the

archaeology, ethnohistory and ethnography of the Caribbean and South America, as well as the archaeology of island

societies throughout the world in general.
